**Thomson plans** link with **SGS** on super-chip

er controlled by the Italian state IRI group, in a FFr 1.5hn (\$229m) ances. programme to develop an advanced super-memory chip.

The joint four-year project is ex-pected to be approved by Enropean ministers in Stockholm next week as part of a series of eight European high technology projects to be adopted under the French-inspired Eureka European high-technology programme.

to develop jointly a new generation four-megabit Eprom chip. Eprom (erasable programmable read-only memory) chips do not lose their memory when the power is switched off, unlike a random access memory or Ram. The Eprom. market, however, is much smaller than the Ram market, amounting to only about £160m (\$230m) a year in Europe at present.

The proposed Thomson-SGS joint venture highlight current European efforts to establish a position in the world semiconducter market, which is dominated at present by US and Japanese companies.

The most important project of this kind is the three-year-old collaboration between Philips of the Netherlands and Siemens of West Germany in the production of 1 meiconductor products.

the nationalised gabit Drams and Srams (dynamic and static random access memories), the workhorse chips which provide the main memory function in computers and domestic appli-

D 8523 B

This collaborative venture is now on the point of commercial produc-tion, and Philips and Siemens have recently gone a step further and launched a joint programme to develop more advanced four-megabit Dram and Sram supermemories. Largely because of this rival programme in Ram technology Thom-son and SGS selected Eprom technology to develop their new advanced chip.

The link with SGS also marks a significant shift in Thomson's strategy. During the past three years the French group has been seeking to build up a major presence in semiconductors largely on its own, last year acquiring the main asset of the US Mostek semiconductor group from United Techpologies.

However, having established a manufacturing base in France and the US, Thomson is seeking collaboration with other European partners. The French group, which ex-pects to lose FFr 200m in its electronic components division this year, is thus aiming to spread the heavy costs of developing new sem-

keep finger

The townspeople of Lübeck, on the north German coast, which lies only three miles away from the huge rubbish dump opened at Schoenberg - on the other side of the border - in 1981, have protested for several years over the estimated 290 lorryloads-a-day of waste that pass through the area on their way

to the East. The Lübeck authorities are now taking the extraordinary step of bringing court action against every West German state (Land) except Bavaria, with the aim of stopping all waste shipments to Schoenberg by December 20.

The actions have already suc ceeded in closing the border to waste traffic from Hesse, and court proceedings against Hamburg started this week.

The moves have caused consteration , above all in the chemical industry, about what to do with roughly Im tonnes of waste that cross into Schoenberg each year from West Germany.

US may fund plans to boost chip-makers

city's water supply. "Everyone wants to dump their waste somewhere else rather than aid.

# Liechtenstein Crown | France upset by lack of help Prince collects a **Texas-size subsidy**

1988.

THE CROWN Prince of Liechten-stein is a partner in a Texas farm that is larger than his own principality - and collects king-size sub-sidies from the US Government, AP

2

reports from Washington. Subsidies of \$2.2m, the largest support payment to any farm in Texas this year, went to Farms of Texas Co., a \$70m farming partnership owned by Crown Prince Hans Adam of Liechtenstein and International Paper, headquartered in New York, according to the Agriculture Department. Prince Hans Adam, 41, the heir

apparent to the throne, owns half of the partnership, which has 22,000 acres in Brazoria County, near the coastal village of Alvin, the company beadquartars; 17,000 acres east of Dallas in Hopkins County; and 9,500 acres near Texarkana.

Records detailing the holdings and government subsidies were made available by federal agriculture officials in Brazoria County.

The Prince's own country is smaller than his holdings in Brazoria county alone. The principality of Liechtenstein, in a valley between Switzerland and Austria, covers only 62 square miles.

Various properties accumulated come. by the royal family over the past 700 years are administered by the Prince of Liechtenstein Foundation, which has been acquiring American

The award ceremony, atte by King Olav V, members of the royal family, government ministers, diplomats, Mr Wiesel's immediate family and close friends, will be followed by a torchlight parade through the streets of Oslo and a banquet in the laureste's honour hosted by the Nobel committee.

Tomorrow, Mr Wiesel will recei a cheque for SKr 2m (\$290,000) that goes with the peace prize before de-livering his Nobel lecture, the traditional acceptance speech.

He told the independent Trondbeim daily Adressavisen on Saturday that he planned to use the entire prize sum to set up a fund to finance conferences for the study of hatred and "what can be done to prevent it from spreading."

# Sale of submarine plans to S Africa sparks inquiry call

Financial Times Wednesday December 10 1986

### BY DAVID MARSH IN BONN

AN OFFICIAL West German South Africans in an affair parliamentary inquiry into the which the Government claims AN OFFICIAL West German parliamentary inquiry into the illegal sale of submarine plans to South Africa looks likely to get underway before the general elections on January 25. The opposition Social Demo-cratic Party (SPD) yesterday joined the Greens ecology party in colling for an immediate came to light only in summer 1985. Mr Kohl has been discomfited

in calling for an immediate inquiry into the affair including the role of Mr Helmut Kohl, the Chanceilor. In a clear bid to maximise

A report in the mass circula-tion Bild newspaper—normally one of Mr Kohl's strongest sup-porters—last week said that Mr Waldemar Schreckenberger, state secretars in the Chancel-lor's office, bad conveyed the impression that both Mr Kohl and Mr Stratuss were "wery" politial embarrassment for Mr kohl during the run-np to the elections, Mr Hans-Jochen Vogel, the leader of the SPD parliamentary grouping, sald he and Mr Stratss were "very interested" in the possibility of boped the first witnesses could be called before January 25. Mr Kohl considered the ques-

tion of selling submarines to South Africa after the question South Africa after the question was first raised in 1984. The Government turned down the idea last year as being contrary to the country's export licensing official United Nations ban on weapons sales to Pretoria. However, blueprints for a U-209 type submarine built by state-controlled West German shipyard Howaldtswerke-Dentsche-Werft (HDW) were none the less passed to the

of selling the boats in 1984.

a submarine saie.

Mr Erich Honecker, the East German leader, said this week that private craftsmen are to be given "greater support" in the future. East Germany's fiveyear plan, adopted last week, also stipulates that private allotment gardeners and collective farmers tilling their own household plots are to be "actively supported" along with other small-scale producers

Last year 15,000 East Germans were permitted to set up shop as private bakers, shoemakers, opticians, locksmiths, greengrocers and restaurant owners..

The gap arose in the decades up to 1981 when East Germany closed down tens of thousands of private craftsmen for ideological reasons. By 1983 the privateers contributed only 2.3 per cent of turnover in the trades compared with 33 per

Eastern Europe were never has been freed from taxes for wholly eliminated, are to be two years and gets a state bonns greatly expanded in coming of up to DM80 (528) per tonne of bread and rolls. He estimates that sales this year will be about DM100,000 and profits some DM 25,000. Shortage of repairmen has led East Germans to offer many times the official hourly wage,

as well as bard currency, to plumbers and car mechanics willing to shorten waiting times of months. As a result East Germany's 255,000 private craftsmen drive the best cars and can afford winter cruises to Cuba

In Czechoslovakia small mustbers of private roofers, plumbers and other repairmen are now permitted. But it is in agriculture where private initiative has made the greatest inroads. Mr Karol Ceresna of the Czechoslovak Ministry of Agriculture said in a recent inter-

view that collective farmers selling produce and meat from their own private plots had led to a higher standard of living

The interest rate increase worked to contain pressure on the franc, causing the D-Mark to dip to FFr 3.2851 at Monday's fixing and FFr 3,2805 in interbank trading ear-But French sources are apparent ly worried that defending the franc by interest rate management could transform the EMS into a constraint on domestic economic growth unless West-Germany co-op-

## Greek protest strike called

### BY ANDRIANA IERODIACONOU IN ATHENS

THE GENERAL Confederation when they first came to power of Greek Workers (GSEE), in 1981, as well as a freeze on Greece's trades union congress, has decided to stage a 24-bour strike in late December in an all other pay increases, to next year. effort to persuade the Socialist

which the Socialists had Inlro-duced with the aim of reducing

Greece's inflation rata and budget and trade deficits.

The meeting favoured extending tha Government's incomes policy for 1986, which featured

The authorities are anxious Alle autornues are annous not to jeopardise their target of. a 10 per ceut inflation rate by the end of 1987. The Finance Ministry's figures for the 1986 state budget also showed that pencious and exclasion continued Government to relax its austerity incomes policy for 1987 for the low-paid. The Government rejected the GSEE wage demand last week pensions and salaries continued during a meeting to review the two-year economic stabilisation programme for 1986 and 1987, to exert an unwelcome pressure on public spending.

The GSEE decision this weak coincided with a wave of strikes coincided with a wave of strikes affecting municipal services and state schools, hospitals and electricity supplies. Municipal dustmen began a five-day strike last Monday while hospital personnel and teachers are to policy for 1500, which featured last monday while hospital a drastic watering down of the personnel and teachers are to system of wage indexation stay away from work today and introduced by the Socialists tomorrow respectively.

# ANNOUNCING THE STRUCTURE THAT FROM **TODAY WILL FORM SCANDINAVIAN BANK GROUP**

Our change of name from Scandinavian Bank to Scandinavian Bank Group is a direct reflection of our commitment to an increasing portfolio of customer services. Indeed, while we are noted for our innovative approach to merchant banking, the Group offers strength in other areas.

Through our Swiss subsidiary, Banque Scandinave en Suisse, we are one of Britain's major providers of direct links to Swiss investment management.

More recently, through our establishment of The Private Capital Group, we are developing an entirely new approach to integrated private banking and financial services.

The words above paint a fine picture of success. Just how successful can be seen by our record. Since our establishment in London in 1969 we have grown to be Britain's eleventh largest bank. Today we are a major source of finance and investment, not only here, but internationally through our offices in key financial centres.

From the beginning we have reached out for innovative solutions. Red tape has no place in our lives. The dedicated

and specialist skills of our staff have enabled us to pioneer a host of new banking ideas. But in all the areas in which the new Scandinavian Bank Group can help customers there is one recurring theme. In a single word it is service.

The Group structure above, we believe, is a convincing answer to those that think a bank's symbol doesn't mean much. To prove our point the next step is yours. Contact us and see how quickly the words end and the action begins.

### The art of British banking Scandinavian style.

# When his ship was torpedoed... so was his future peace of mind

Leading Seaman R....tH......n served right through the war. He was torpedoed in the Attantic and suffered from exposure. He served in Landing craft, and his home received a direct hit from a bomb while he was there on leave. In 1945 his mind could take no more, and he spent the next 25 years in and out of mental hospitals. He now lives with us. Saftors, Soldiers and Alimen still risk mental braakdown in serving their country. However braakdown in serving their country. However unbearable. We care for these callant men and woment,

unbearable. We care for these gallant men and women, at home and in hospital. We run our own Convalescent Homes, a Hostet for the younge homeless who can still work, and a Veterans' bloom by the analysis who are no form Homeress who can still work, and a veterans home for the speing warriors who are no long able to lock after thomaeves. # Europe nears pact

By Raymond Snoddy in Vienna MINISTERS from the 21 mations of the Council of Europe were last night moving towards the creation Such action would be the most radical gesture the Com-

of a legally binding conven-tion on trans-frontier telemission has ever made in devision. Mr Karl-Heinz Norjes, the Commissioner responsible for the sector, told ministers during The move, at the council'e first meeting of mass-media ministers in Vienna, is seen by several European nations including Britain, as an alter-netive to the controversial European Commission draft directive on television.

The directive, which has been severely criticised, proposes quotas on the propor-tion of EEC programmes which should he shown on Among the several comprotelevision channels and on the amount of independent mise proposals being soncidered by national officials yasterday production.

by national officials yasterday was a method put forward by Belgium, with the support of its two Benelux neighbours, of slimming the framework budget to Ecu 6.6km by adjusting the timing of the funding. It sug-gested that Ecu 1.1km could be included in the current, under-If the Council of Europe formally decides to recom-mend a legally hinding con-vention, the EEC draft directive looks unlikely to be passed in its present form.

The convention which The convention which would have to be accepted by Connell Foreign Ministers and ratified by individual governments, would provide a legal framework for satel-lite television throughout Enrope and deal with prob-lems of copyright, and stan-dards for both programmes and advertising. Meanwhile, member-states re-

Mr David Mellor, Home Office Minister responsible for broadcasting, said yesterday: "There is a widespread recognition that the Council of Enrope with its lighter hand and larger membership is mneb more likely to get regulations in the sensitive areas right than the European munity.

Mr Mellor put forward an amendment calling for the highest priority to be given dey. to the rapid preparation of a legally hinding convention.

There was a growing conthere was a growing con-sensus at the conference last night that such a recommen-dation will be approved to-day and a working party set np to prepare it. France, which had been thought to be against the convention, is now

expected to support it. The BBC, the IBA and the British Government are opposed to the Commission directive on the grounds that cultural products should not, as Mr Mellor said, be regulated like "sausage meat."

Mr Mellor said yesterday: "When EEC representatives speak of the range of cultural and other matters as being within EEC competence, we would have to beg to differ."

Dr Ivo Schwartz, one of the principal authors of the green paper on which the draft directive was bas

# STRASBOURG SPEAKERS ATTACK EEC LEADERSHIP

# **Thatcher strikes back at MEPs**

### BY QUENTIN PEEL IN STRASBOURG

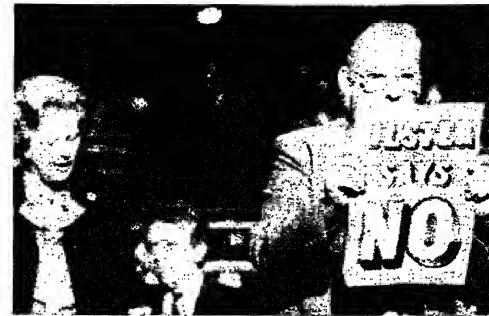

**EUROPEAN NEWS** 

MRS MARGARET THATCHER the British Prime Minister, got stuck in yesterday to a bruising encouoter with the European Pariiament on the echievements of the British EEC presidency and last week's London summit, She was accused by speaker after speaker of falling to pro-vide leadership to the Com-munity over the past five months, and holding an irrele-vant summit of heads of government which avoided the funda-mental problems of reforming the Common Agricultural Policy and tackling the EEC hudget

crisis The I2-nation assembly in Strasbourg was treated to the extraordinary spectacle of the British Prime Minister coming under attack for not being tough enough in tackling farm spending, or resolute enough to deal with the real financial crisis looming. Mrs Thatcher replied with e

furious defence of her chair-manship, of British attitudes to the EEC, of sound economic policies underpinning any plan to tackle unemployment, and of e summit agenda focused on ter-porism densitation cancer and

She also had to face a one-man demonstration by Mr Ian Paisley, the Democratic pean Democratic group domi-fumping up and down in front servatives—and with Mr of the television cameras to wave posters denouncing the Anglo-Irish agreement Unionist MEP from Uister, nated by her own britan con-jumping up and down in front servatives—and with Mr with erstwhile allies threaten-of the television cameras to Jacques Delors, the president of wave posters denouncing the the European Commission. Sir Henry Plamb, the British centrating on t Anglo-Irish agreement, hefore She treated them to a West-he was expelled from the cham- minster-style response: "I have when he stands for presidency in the summit.

Mr Ian Paisley, makes his protest as Mrs Thatcher speaks to Enropean MPs

er. been accused of irrelevance," The British Prime Minister she said. "The accusation mostly anaged to cross swords with comes from those who show

some tendency to suffer from the disease themselves." Her fighting attitude left the MEPs in considerable uproar, with erstwhile allies threaten-

of the psrliament next month.

Mrs Thatcher's thesis was that the British presidency of the Community, which hegan last July, was concentrated on issues relevant to ordinary peopleopening up the common market, promoting competition between air lines, and con-centrating on the scourges of terrorism and drug-trafficking

to, for example to resolve con-flicts."

Last week the Chancellor of Justice published a report in which he claimed that on several occasions Mr Holmer bad failed to show "a necessary will to co-operate " with the previous chief prosecutor assigned to the Palme investiga-tion, Mr K. G. Svensson. Mr Svensson resigned from

the case earlier this year

### Iran demands Saudis cut oil output BY RICHARD JOHNS IN GENEVA

**BY RICHARD JOHNS IN GENEVA** IRAN yesterday called for a reduction in the Organisation of Petroleum Exporting Countries' collective output and a lower rate by Saudi Arabia in particular as delegates con-vened here for the ministerial conference starting on Thurs-dey. **Before** his departure from Tehran Mr Gholamreza Mr Gholamreza Saudi Arabia in on longer he allowed to export as much as it is physically able to. **Mr** Hisham Nazer, the new Saudi chief dalagate, appears to one inflamed by overproduction by tha Kingdom and other pro-ducers of the Gulf as well as an

fixed central price of \$18 per barrel should he set without eny cut in the production of his own country or Opec as a whole.

Asked if a reduction in over-all Opec output would be agreed as a means to attain a price objective Mr Nazer said on his arrival: "We will find out very ducers of the Gulf as well as an appears to be insistent that a soon."

Public Prosecutions and the Chancellor of Justice have called for the replacement of Mr Hans Holmer, the Stockholm Police Chief, ss the leader of the investigation into the assassination of Mr Olof Palme, the Swedish Prir; Minister. The leadership of the murder hunt has faced a crescendo of criticism in recent days as

frustration grows over the apparently fruitless investigation. Earlier reports of tensions between Mr Holmer and the prosecutors working on the case have been officially con-firmed in a report from Mr Bengt Hamdahl, the Chancellor of Justice.

Criticism

Palme

mounts over

murder hunt

By Kevin Done in Stockholm

THE Swedish Director

Mr Hamdahl has been openly critical of the organisation of the murder hunt, and this stance bas now been given out-spoken support by Mr Magnns Sjoherg, the Director of Public Prosecutions.

Both these senior officials claim that Mr Holmer should resume his duties as chief of police in the Swedish capital and that the murder bunt should he led by an experienced senior detective of lower rank in the police force.

"It is a practical question," said Mr Sjoberg. "It would ha simpler to deal with new situa-tions if there was en additional level in the hierarchy to purn

A mission system being developed jointly by GEC Avionics and the Lockheed Georgia Company.

But if GEC Avionics does not win the defence contract for the British airborne early warning system, this further development of the AEW Nimrod will never leave the drawing board and take to the air.

That would be a great loss. Sales of the C-130 are already being negotiated in no fewer than 28 overseas countries.

Export business that is worth, quite literally, billions of pounds. And export business that will safeguard the future of Britain's independent avionics industry.

Not that this potential export bonanza is the only reason to favour the GEC solution. We guarantee that the AEW Nimrod will work.

Our contender is also half as costly as its rival. And the Boeing offering will take much longer to develop to full RAF specification.

Then there are the 2,500 jobs that buying American will put at risk. Jobs that offset trade from Boeing will not save.

Of course, Boeing can well afford to barter. Having effectively killed off their only serious opposition they would be set to cream off profits around the world.

Whichever way you look at it, the AEW Nimrod is by far the best option.

It alone will protect British livelihoods as well as British lives. **GEC AVICNICS**

House hearings on insider trading begin today. Roderick Oram reports

# **SEC** prepares the case for defence

WHEN Mr John Shad worked arsenal are the computerised on Wall Street, one of his transaction audit trails and friends was a local agent of the market surveillance systems Federal Bureau of Investiga-tion. The agent detected a tech-lowing discussions at an SIA niqua comon to the two businesses one day when watching Mr Shad persuade a contact to spill the beans on a company he had just quit.

Stool-pigeons were their stock in trsde, the agent sug-gested to Mr Shad, who is now the ebairman of the Securities and Exchange Commission, Washington's Wali Street watchdog.

Mr Shad might have regretted telling the story last week at the annual meeting of the Securities Industry Associathe Securities Industry Associa-tion. It led to two inevitable questions: for all the sophisti-cated systems of the SEC and stock exchanges, did it not take an anonymous letter from Caracas, Venezuela, to alert authorities to the insider trad-ing of Dennis Levine? Without Levine's evidence would they have caught Ivan Boesky, lynch-pin of the jargest Wall Street insider trading scandal in years?

insider training years? Taking his cue of "no and penalising insider trading comment" from Mr Richard to co-operstion agreements with Ketchum, the SEC's director of other countries, particularly on market regulation standing at bank secrecy, have given inves-the hack of the press con-ference, Mr Shad stressed in-they've ever had before." The SEC's activities have more than matched the rapid

exchanges had made in detect-ing suspicious trading patterns. He is due to testify to e House subcommittee today on insider trading and the agency's bandling of the Bosch sere

which the exchanges set up fol-lowing discussions at an SIA meeting five years ago. These systems are essential to "the initial gearing up and hot pur-suit" of investigations, but Mr Shad did allow earlier in his presentation that "soma of the most important cases we've broken have come from informants."

The SIA believes that the effectiveness of these relatively new tools should be further tested before any more market regulation is introduced. One spin off of the audit trails has been easier and cheaper reconciliation of the 3 to 4 per cent of erroneous transactions mada each day, Mr Shad said.

سياقي في الم

He reminded tha andience Shad: that only five years ago some leading publications suggested little could ha done about eradicating insider trading since it appeared to be woven into the fabric of Wall Street. But a number of improve-ments ranging from the audit traile and new lows defining

investment advisers has grown 105 per cent but investigations of them have grown 150 per cent; trading volume is up 150 per cent and the number of transactions up 30 per cent but the SEC's investigations of them grew by 60 per cent.

"This great bull market has not brought the past," Mr Shad said. The securities industry "has never been healthler than more than matched the rapid growth of the markets. Since 1981, full disclosure filings have increased 40 per cent while the SEC's reviews of them rose 65 it is today," so Congress should handling of the Boesky case. Per cent; the number of broker- consider very carefully any Key weapons in the SEC dealers has risen 57 per cent proposals to tighten market

regulations. Few would pass, he predicted, the most likely being a reduction to two days from 10 in the maximum period an investor can wait before declar-ing to the SEC a stake in a

For its part, the SEC is computerising its filing procedures to speed up the dissemination of information. Its present paper-based ssytem can long deay market-sensitive information from companies and in-vestors reaching a wider audi-

A pliot version of Edgar (Electronic Data Gathering, Analysis and Retrieval) has heen running for two years. The egency will be asking Congress for e large budget increase to help It apeed up implementa-tion, beginning next year. Tha SEC wants to spend up to \$20m on hardware for Edgar in the fiscal year beginning next October.

The SEC now gets about \$110m, although that is more than recouped by the \$200m a year in fees paid to the agency by companies and investors. A final request is still being for-mulated but Mr Sbad indicated it could be for up to \$45m, mak-ing it the largest increase in 50 ing it the largest increase in 50 years. Some securities lawyers say the extra resources for the

SEC are long overdue. Besides Edgar, tha new money will allow the SEC to ex-pand its staff of just under 2,000 for the first time in five years. Some would be deployed in en-forcement, which already accounts for one third of employ-

### Shultz takes steps to restore **Brazil and** Argentina to set seal on collaboration

### By Ivo Dawnay in Brasilia

THE DIPLOMATIC initiative to achieve substantially closer ties between Brazil and Argentina

between Brazil and Argentina takes another step today when the countries' presidents sign 20 agreements ranging from customs tariff cuts to collabors-tion on arms production. Although maily of the occords were approved in principle dur-ing President Jose Sarney's visit to Buenos Aires in July, con-biderable fiesh has been added for President Raul Alfonsin's four-day return trip.

for President Raul Alfonsin's four-day return trip. Diplomats in both countries are reported to be convinced that progress in the 150-year-old dream of a Latin American com-mon market is being made, despite a history of distrust between the states Many businessmen and indus-trialists appear to have shaken off much of their scepticism and launched a parallel series of encounters. But there remains considerable mistrust in some quarters, particularly in the farming community. Prior to President Alfonsin's

## exporters greet US import pact By Robert King in Taipei

Major Taiwanese exporters are heaving e strong sigh of relief over their government's agreement with the US finally to allow US beer, wine and tobacco products to be imported at reasonable prices. Export industries, such as

electronics, footwear and tex-tiles, were seen as prime candidates for American retaliation under Section 301 of tha US Trede Act if Taiwan had not finally reached agreement with US negotiators on imports of

these products. Section 301 grants the US President hroad powers to penalise any trading partner believed to be engaging in un-fair trade practices.

#### Criterion

Taiwan met that criterion in the case of the alcohol and tobacco imports when it continued to insist on what the US felt were unreasonably high tariffs and advertising restrictions for products.

Manufacturers and buyers of Taiwan-made shoes, for in-stance, have been nervously wondering when penalties would come into force.

Exports of shoes which have been climbing rspidly since quotas were lifted in 1983, are expected to top \$3.5bn (£2.5bn) this year from just over \$2.2bn-worth in 1985. Such e growth rate would bave made the industry a likely targat for Section 301 penalties.

### Pressure

6 per cent lower than in October, as the volume of exports dropped by 7.7 per cent. The Government has met the US terms following pressure from the US whose trade deficit with Taiwan exceeded \$12.4bn during the first 11 months of the surplus with the EEC, however, widened again. The volume of car exports alone wos down 17.8 per cent from the level in November 1985 to 540,000 units. Television this year, from exporters unwilling to see their sales hit by US penalties, and from pro-gressive officials dedicated to trada liberalisation.

gressive officials dedicated to trada liberalisation. Taiwan atill has other hurdles to clear before its relations with its largest trading partners such moves as slow-but-steady reduction of tariffs and sporadic ending of bans on service-indus-try participation. Tor instance, the 100th Con-

Senate was preoccupied with Eximbank's "war chest" of tax reform and the House made trade into a campaign issue for aid funds to accompany export credit, to ratification of the Intarnetional Coffee Agreement.

the elections. The Reagan Administration wants a Trade Bill, not only If it can overrise the presiden-tial veto. We can't say till that hypothesis is tested," Mr Yeutter said. One risk, be said later in a apeech to the Confederation of figures who are opposed to pro-British Industry, is that it will be driven in that direction by the actions of other countries. "President Reagan cannot bold heck protectionism if there

Theoretically the US could Theoretically the US could wait for four years, or how-ever long the Gatt talks take, before obtaining such an authority from Congress. Long hefore that, however, Mr Yeutter expects a Trade Bill to have materialised.

For that time being a lot de-pends on preliminary hearings in hold the new House and the Senate. Mr Yeutter says he does not know what these hearings will bring, "but 1'd rather be optimistic that a constructive product would amorne " product would emerge."

The other plank of the present approach is to persevere with tha crusade against unfair practice. Speaking in New York last week, Mr Yeutter said that in many foreign capitals the US now had a "Rambo" reputa-tion as a result of this cap tion as a result of this campaign.

when it crashed in the Irish Sea last year and it is likely to purchase an idantical type In London this week he said that such a reputation bed not been sought out of e desire for confrontation. Simply " in my judgment the US has been much too placid and tolerant in the face of unfair trade practices for too many years. That has now changed." to replace it later. The international airline placed an order fur six Airbus A-310 aircraft last year, with an option for a further six. It chose them in

preference to Boeing-767s to replace ageing 707s on its shorter routes such as the Middle East. European officials gearing up for another session at the week-The Airbuses are now being for anomer session at the week-end on their dispute over US grain exports to Spain should be left in no doubt that he really means what be says. delivered, and the Boeing-747s are needed to supplement them on longer routes to Europe and North America.

### **EEC** official hits at Tokyo over trade

By Carla Rapoport in Tokyo

By Carta Rapoport in Tokyo ANOTHER BROADSIDE was fired at the Japanese yester-day by a senior EEC official won said that relations between Europe and Japan looked "pitiful." In a farewell briefing yesterday, Mr Laurens Jan Brinkhorst, departing head of the EEC delegation in Tokyo, said: "Jopan has succeeded in uniting the Community" un the issue of its Jarge trade imbalance with Europe. "It looks pitiful that rela-tions betwees two major pomers in the world are syntholically bogged down nver such an issue as wines and liquors," he said. Japan's taration system on spirits, according te the EEC, is discriminatory to foreign imports. Failure to solve this issue "seems te be symbolic of a very unsatisfactory relationship," Mr Brinkhorst added.

"The changes in (price) China is considering plans support levels don't need to be from Boeing and Messerschmitt-spectacular, but they do need to be sustained." be said. # THE AIRBORNE EARLY WARNING DECISION COMES DOWN TO THIS: WHAT'S BEST FOR BRITAIN?

There are no questions, no doubts, about the ability of the Boeing Airborne Warning and Control System (AWACS) to accomplish its mission.

Here's the evidence:

AWACS has the best performing airborne early warning radar in the world.

More than 50 AWACS are in service worldwide; it is the system selected by NATO.

AWACS has capacity for significant growth – a capability necessary to stay \_\_\_\_\_\_ahead of an ever changing threat.

> The selection of AWACS will also create high technology jobs in British industry.

> > Boeing has made

a 130% offset commitment to the British Government.

This means that for every 100 million pounds Britain spends with Boeing on AWACS, Boeing and its industry team will place 130 million pounds of work in the United Kingdom.

It means a new partnership; a unique opportunity for Britain in the continuing export markets for AWACS and in a wide range of related advanced technologies – computers and data processing, power systems, advanced radars, electronic warfare, communications, advanced aircraft and flight management systems – technologies that are in demand and that will create thousands of jobs throughout Britain.

likely to order the Boeing.<sup>77</sup>

This offset commitment has been welcomed by British industry across the country.

Boeing and its team have consistently exceeded their past offset commitments.

Already, Boeing and Westinghouse, the AWACS radar supplier, have partnership agreements with three of Britain's largest defence contractors – Plessey, Racal and Ferranti. These international partnerships will extend well beyond AWACS.

Here's exactly where we stand:

First, AWACS is a proven, technologically superior system.

Second, AWACS is the most cost-effective solution to meet the needs of the Royal Air Force for years to come.

Third, the Boeing team will bonour its offset commitments.

AWACS is best for the defence of the United Kingdom. And the better deal for British jobs and industry.

# **Poll gives Tories six** CORUM point lead on Labour

BY PETER RIDDELL, POLITICAL EDITOR

THE TORIES have a 6 percentage point lead over the Labour Party their largest lead for more than two years - according to e Harris Re-search Centre Poll for TV-am, the breakfast television channel.

The survey of 985 voters carried out last weekend puts the Tories at 41 per cent, compared with 35 per cent for Labour and 22 per cent for the Social Democratic Party/Liberal Alliance. This compares with 40 per cent for the Tories last month, 36 per cent for Labour and 21 per cent for the Alliance.

This lead is much larger than in other recent polls although it con-firms the marked improvement in Conservative fortunes during the autumn. Indeed, some 54 per cent of the Harris sample expected the Tories to win the next general elec-tion, compared with 24 per cent which thought that Labour would

Move to gag civil servants attacked By Pater Riddell

THE Government faces intensified all-party backbench pressure to drop its proposed instruction to civil servants not to answer questions about their conduct from House of Commons select committees.

The suggested government re-striction on the accountability of civil servants was put forward in the wake of the Westiand affair and the decision to stop five key civil servants from giving evidence to the defence committee. The issue has also arisen over the trade and industry committee's inquiry into the tin crisis.

As a result of another DTI inqui-There has already been some angry backbench reaction in view of fears over undermining the role of select committees inquiring into the actions of the executive, and the Brothers as its adviser, at least for Government bas had to promise that the instruction will not be for-mally issued until the relevant committees have reported.

The Treasury and civil service committee yesterday produced a re-port attacking the instruction. The MPs said the order "would be open to misinterpretation and might inhibit civil servants from giving select committees information in the way they bave always done."

Mr Terence Higgins, the Conservative chairman of the committee, said the aim was to get the Govern-ment "to recognise the strength of the argument.

Meanwhile the DTI investigation The liaison committee, of which has focused on share dealings car-ried out by Drexel Burnham Lam-Mr Higgins is also chairman and which consists of the chairmen of bert, the US securities house which all select committees, will now consider the practical implications in relation to Parliament and hopes to report before Christmas.

There will then be discussions with Mr John Biffen, the leader of the Commons. Mr Higgins said he was optimistic about resolving the problem although other MPs, in-cluding Tories, thought the issue would have to be brought back to the floor of the Commons to challenge the Government.

The report argues that select committees regularly take evidence from officials concerning their actions on the basis of ministerial policy.

The Treasury committee says: "It would be quite wrong and entirely The value of Austin Rover's sales unacceptable for any restrictions to be placed on the giving of such evidence, and we are sure that, on reflection, the Government have no intention of doing any such thing.

> "It is obviously highly desirable that the Government should make this clear." First report from the Treasury

# rged to he jects

It inherited the family traits of strength, safety, durability, comfort and much-envied build-quality, at the same time setting new standards in the field of aerodynamics.

It has packed into its deceptively compact profile every attribute that has made Mercedes-Benz owners the most loyal in the world. And that's why most people are buying it.

But the 190 broke new ground. It introduced a remarkable new multi-link rear suspension system. A patented system that lets a driver take the ample power generated by the 190's engine range and use it to move people and things extremely quickly and comfortably.

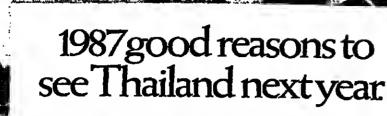

It was also the first recipient of an ingenious new single-blade wiper system that reaches out to clean a panoramic 86% of the windscreen.

The 190 is not a sports car, but it can be driven like one. It will satisfy even the most enthusiastic driver, being engineered to the point where it will do practically anything you ask of it.

You'll buy the 190 because of its traditional Mercedes-Benz values. You'll enjoy driving it for rather less pragmatic reasons.

Engineered like no other car in the world.

UK suppliers have begun to tailor mobile communications packages to the needs of particular companies and industrial sectors. David Thomas concludes this series by

12

examining the spread of services within British business and the impact new frequencies will have on operators of private mobile radio.

# Who gets what: **Patterns of use** begin to change

JACQUES BLANCHE, senior vice-president of Alcatel, the French telecommunications giant, has spent many bours on the frustrating business of setting up France's cellular phone system, ooly now getting off the ground. Yet he elready has a vision of a revolutionary type of mobile communications which could cut across cellular. Mr Blaoche foresees a time

when communications mobility will rest, not in a phone car-ried or driveo around, but in a card to be found in every-one's pocket. Every phone, pri-vate as well as public, will bave a slot into which these cards can be fitted.

When a salesman visits e customer, be will drop bis card into the slot of a convenient phone: if be makes a call, the cost will be charged to his account: and, more impres-sively, if anyone dials bis personal number, the call will automatically be routed to the bone where bls card is resting. ness of selling packages and Mr Micbel Gaultier, eoother services, not just gadgets. Frenchman, has a different "Mobile communications has visico of communications on the move, He works for AT&E,

their children when a meal is ready.

These two visions-the first probably a long way from reali-sation, the second only a year away—show that little in the world of mobile communica-tions can be taken for granted. Extrapolating what exists now, even to the end of the decade, is risky, because new technolo-gies and services will be on the agenda by then.

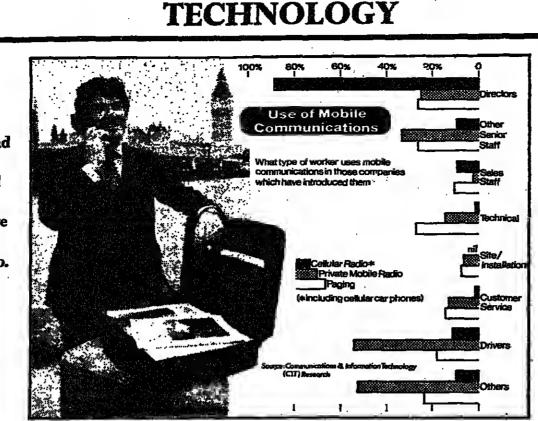

But this raises the question f where this is all heading. Are businessmen to be faced with a stream of new communications technologies, as baffling as the latest develop-meot in personal computers? Will the ultimate point of im-

proved communications-doing business more efficiently-be lost in a flood of gadgets? John Carrington, chief execu-tive of British Telecom Mobile Communications, thinks not. He says mobile communications companies are now in the busi-

moved out of the Rolls Royce and is now something which

the move, He works for AT&E, a Californian company develop-ing a wristwatcb-pager which it is calling Receptor. The Receptor, to be launched in the US at the start of 1988 is novel for two main reasons, It aims to be truly interna-tional: a managing director in Loodon will be eble to page his in calliar director as be sits in calling director as be sits in calling director as be sits in cally diverted to to be compared to the needs of particular com-so, for example, if an execu-tive is out of his car, calls to his cellular phone are automati-cally diverted to volcebank. isation. While this hierarchy is still evident, it may be softening. BT Mobile Communications says that of the 20 per cent of its paging customers who drop out each year, about 8 per cent do so to trade up to cellular so to trade up to cellular. Cellular usa is spreading downwards from self-employed cally diverted to Voicebank, BT's voice messaging service,

use to the company if they year confirmed: directors and senior staff got cellular phones; could be contacted during this workers like drivers got private mobile radio; and pagers were downtime.

Microgen, a computer microspreed more evenly in an organicba bureau in Radlett, Hertfordshire, has tried to pin down the benefits of giving car phones to its 28-strong sales force. Mark Woodhouse, its market-

ng manager, says salesmen are eble to make up to 15 per cent more calls; can stay out of the office longer; and can be con-tacted by bead office during the 30 per cent of time they spend travelling. Moreover, using car-pbones fits in with the com-pany's high tech image.

However, no one seems to bave thought much about whether the extra calls are strictly necessary or whether workers are under more strain by being continuously exposed to the phone. Mobile phone enthusiasts say strain is less, because people en roote to meetings can phone ahead when stuck in traffic.

Many organisations are not put off by the cost of the newer types of mobile communica-tions. The fact that using a cellular phone in the UK or the Nordic countries is about 10 times the cost of using a tone-only regional pager, on one estimate, has not dampened the growth of cellular.

John Carrington, of BT Mobile Communications, says the price of the cheapest cellu-lar phones has tumbled from about £1,250 when the service was first introduced last year to about £750 now. He reckons

that in future prices will not fall so sharply. But there is probably still room for strong growth before the market is saturated in the UK. There are less than Im people using any kind of mobile communication in the UK at present: Mr Carrington estimates that ebout a fifth of the working population-some 5m people-are potential

eustomers. Previous articles in this series:

SECURICOR. UK security ser- viously used for black-and-vices group and long-time white television, will change mobile communications user, is this position. Working on the som of device

working on the sort of device normally seen only in spy films. By beaming radio signals Telecommunications bave been room different transmitters it given two national Band III from different transmitters it will be able to pinpoint the position of its company vehicles to within 50 metres. This information will be regis-tered at set periods, ranging from every two seconds to every five minutes, both in the cab of a vehicle and back at the vehicle's base. This location device, which Securicor intends to start

which Securicor intends to start marketing commercially in the middle of next year, bas been developed in one of the for-gotten corners of mobile com-munications — private mobile radio (PMR). Relatively cbeap national coverage of good quality should be available. Users will not

In use for more than 30 years, PMR is the communications system which guides vehicles of the police, ntilities like the gas and electricity, taxi drivers and motoring organisations. It differs from cellular radio in that it operates in closed user-groups • There will probably be some, limited, interconnection with the public phone network and also, through private exchanges, with phones in users' offices. - for example, taxi drivers talking to base - and tha mess-• Extra services such as deta (print-onts of new delivery points, for example) will become ages are short, often instruc-tions. vallable.

There are about 400,000 licensed PMR units in the UK at present, but growth has been held back by a shortaga Band III customers will prob-ably not differ much from the traditional users of PMR. Pat of frequencies. A Government Keller, managing director of lar for its worker decision earlier this year to GEC Communications says be those typically ge free a wedge of spectrum, expects his new network to be phones now-di-known as Band III and pre- used by people like freight senior salesmen.

USE OF all forms of mobile communications in Western Europe is growing by 40 per cent e year, a much faster growth rate than in almost any other sector of the com-munications industry, according to a report\* published yesterday.

The report, by Communica-tians and Information Tech-nology (CIT) Research, a London - based communications company, looks in detail at European demand for cel-Inlar phones, wide area paging and private mobile radio.

There are 500,000 cellular phone users in Europe, and the figure is likely to grow by about 30 per cent a year for the rest of the decade, the infrastructure and service revenues, the total value of the European mobile com-munications market in 1986 will be nearer \$2bn, report says. Within 10 years, cellular users should have The report expects spend-ing on equipment to have reached 3.3m.

appliance companies. But the more universal cover-age and the better quality should lead to a greater take-up. One estimate sees PMR units aimost donbling to 750,060 by the end of this decade. What is unclear as yet is whether a more effective PMR service will take customers away from the booming cellular net-works. Band III operators will almost certainly pitch their prices to undercut cellular.

cellular. BT Mobile Communications, which has e 20 per cent stake in National Radiofone, licence holder in five regions, says it will probably charge a monthly service fee of £15-£20 and e call fee of about 10p e unit. The equipment per vehicle will probably work out at about £500. These charges are below cellular, but above the limited type of PMR currently evail-able for smaller organisations. Mobile communications com-

Mobile communications companies, which often offer cellu-lar, PMR and paging, usually insist that these three types of services are complementary, each suitable for different sorts of workers and uses. But, companies may prefer a cheap, effec-tive, national PMR system, with strictly controlled links to the public phone network, to cellu-

lar for its workers, other than those typically getting cellular directors and

EUROPEAN MESSAGE COMES OVER IN A BIG WAY

These rapid growth rates will feed through into strong demand in the equipment

narket, the report suggests. It forecasts that this year equipment sales should top the \$1bn mark, np 50 per cent on last year's \$670m.

Adding in spending on

risen to an annual \$1.75bn by The report expects the 1m 1990, with total business at abont \$40n. wide-area paging users to double by 1990. Private mobile radio will show slower However, it cautions growth-about 5 per cent a year-because with over 3m PMRs already in use, there is less scope for expansion.

abont over-crowding: "There may now be too many organisations with the resources and desire to enter the field of petwork and equipment provision." The US Bell telephone operating companies, American Telephone & Telegraph and some large Japanese groups may try to enter or boost their presence in a market which already has more than a dozen strong contenders in Europe.

# CREATIVITY AND COMPETENCE

### LARGE ITALIAN PROJECTS FOR THE OFFSHORE INDUSTRY

On the 21st November last, installation of the platform on the underwater templa-te in the offshore oilfield of VEGA (25 kilometres from the coast of Southern Sicily), was successfully completed.

On behalf of SELM – Società Energia Montedison – the block operator having as partners AGIP, Petromarine and Ca-nada North-West, Tecnomare performed the complete design of the structure, template, top-side equipment and marine operations, also executing the purchasing of materials, the assignment and management of the contracts for con-struction and installation of the platform: another success for Italian offshore technology.

Tecnomare, involved in the research, engineering and development of advanced marine technology, has thus added another first to their achievements:

1972 - LUNA: The first platform offshore Italy in deep waters.

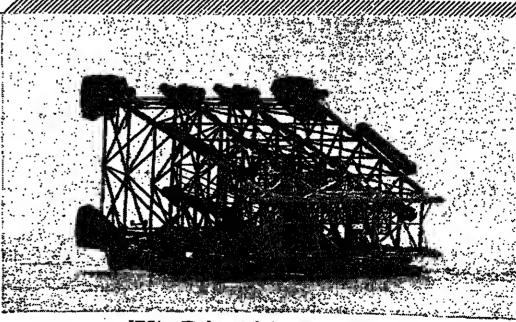

1974 - ALBUSKJELL: The first platforms complete with drilling and production equipment for the Norwegian Sector of the North Sea designed in Italy. 1976 - LOANGO: Offshore Congo - the first steel gravity platforms in the world. 1977 - BARBARA: The first platform in the Mediterranean completely instrumented with a permanent structural monitoring system.

1979 - ENCHOVA: Offshore Brazil - the first platform of the second generation, in a water depth of 126 metres with skirt piles and

integrated deck. **1983 - MAUREEN:** The largest steel gravity platform in the world - 40,000 tons - water depth of 96 metres - with integrated storage capacity, the only steel gravity platform in-stalled on an underwater template with predrilled wells.

1986 - BOURI: Offshore Libya - the largest platform in the Mediterranean, in a water depth of 170 metres, the first jacket of the third generation, self-upending type, conceived for the use of underwater hammer for pile driving.

1986 - VEGA: The largest platform offshore Italy.

VEGA - The largest platform offshore Italy.

# They said the best place for us was behind bars.

There we were, quietly going about our business in sunny Rickmansworth, when the phone rang:

We were told that our mission (should we wish to accept it) was to make the system more simple, more portable, more flexible and truly international. Which is a bit like asking someone to nail a jelly to the ceiling.

You may be wondering why a multinational company should choose a UK operation for this task.

INDUSTRY

INCH

"Your next big job will have you all behind bars," said a mysterious voice.

"Bars?" we gulped.

"Bar codes" came the reply.

We pressed for more information.

It transpired that our associates in Japan had developed a sophisticated electronic point-of-sale system that used a 'holographic laser scanner' to make sense of all those black and white lines you see on most of the products in shops.

With a flick of the wrist, this system would give an itemised print-out to the customer, display the product's name and price at the checkout and then relay the information to the head office and the stock room, so that management were aware of sales figures and shelves were kept full.

As we enjoy a challenge, our experienced software engineers soon found themselves designing the tools to enable the integration of application software (that of others, as well as our own) and the use of spreadsheets and databases, thereby making it possible for users to set up an interface with their existing software.

While doing all this, they somehow found time to write a quarter of a million lines of program in 'C' language.

By July, we felt confident enough to run the results of our labours before the discerning eye of a senior executive from Japan. She admitted to being pleasantly surprised. (We admit to being secretly chuffed.)

The answer does not lie in industrial nepotism or philanthropic ideals.

It's because the UK leads the world in innovative software skills.

If we hadn't been up to the task, the job would have gone elsewhere.

But retail automation isn't our only area of development expertise in the UK.

We are involved in building new systems and products in computer software, satellite communications, mobile radio, customised semi-conductors and factory automation. All as innovative as our work behind bars.

Which just goes to show: there's quite a bit more happening in Rickmansworth than meets the eye.

d against this trend is the Al Muile Group, a typically out any planning at all. diversified Arabian family con-cern which does the biggest part of its business importing itself known as a w cars — it has the agencies for company, once remarked Mitsublshi and Chrysler.

It also selis Kato cranes, Fuso trucks, various types of indus-trial machinery, domestic appliances and packaged foods. Contracting divisions build air-conditioning, plumbing and electrical systems and run cleaning and maintenance ser-vices for hospitals, airports and other large public buildings. The group as a whole this

year is expected to have a turn-over of about \$140m, roughly the same as in 1984 and 1985. It is one of the half dozen biggest merchant houses in Kuwait and one of the two or three best maneged.

It has a very long serving senior management and is highly unuaual in the area in baying a board with a majority of non-Kuweiti professionals who can, and do, outvote the family.

The directors believe the reason wby they have maintained their performance in the severe Gulf recession, which bas seen some companies' turnovers drop by 80 per cent, is that they had a triel run in 1979-80.

This was when Chrysler was in trouble. Its cars had a reputation in Kuwait for being unreliable and, worse still, potential customers feared that the company might go bankrupt. Sales of the cars fell by more than half, from 5,000 units a year—and they have continued

### Affable

No sooner had the company got over the Chrysler crisis than Kuwait'a unofficial stock market, the Souk al Manakh, crashed in September 1982. Seeing thia and the weakening oil market, Anwar Mulia, the Group'a affable deputy chairman, says the board started looking at economies.

"We esteblished a committee to see where saving could be made," he remarked recently. "And we have since monitored developments in each part of our market very carefully. Each of our departments prepares its own budget for the year ahead and updetes it quarterly . . We have kept reducing our orders of most items and we have not been ceught with unsaleeble

stocks " The group's maneging director, Apkar Hovaguimian, e Lebanese Armenian, adds that Mitsubishi is much better than other Japanese car companies in not force-feeding its distributors -pushing them into expanding, or not reducing, their orders when their markets are

WHEN faced with recession decided that they had to diver- any depth or produce hudgets most Middle Eastern businesses aify, and so they went into of any sort. One of the other try to hibernate. They have no idea that it is possible to invest tion with Pritchard Services, has unsold models from 1982 was caught by the recession with 70 beavy cranes in its inventory. In effect the Al Mulla Group

has come up with four lines of action for dealing with the recession:

It has continued to diversify. Today the company reckons that it handles most of the hig air-conditioning projects in Kuwait and its air-conditioning division's maintenance depart-ment is projecting an increase in turnover of 70 per cent next year

At the same time its cleaning and maintenance operations bave won contracts for six bospitals in Kuwalt and 11 in Iraq, as well as for Baghdad airport.

The result of these successes stop somebody else getting is that the percentage of the group's turnover contributed by activities other than car sales

ment costs. ■ the company has reduced its staff from 3,000 to about 1500 to about 2,500, which has aaved it more than 1.5m a year in salaries. Three departments bave been merged and two bave been closed altogether. These were the legal department and the medical department, which was deemed to be unnecessary

because there is a free public health service in Kuwait. Computer costs have been reduced by the company switch-ing from e big main frame to a system of distributed process-ing, in which a series of "minicomputers " in the various divisions are linked to a " superment. mini" in head office. Because it is extremely expensive for a company to maintain a large full-time computer staff in Knwait, programming bas been

sub-contracted to Sri Lanka and India, with what Hovaguimian says are " excellent results."

To encourage individual de-partments to cut costs, as much as possible of the group's overheads are being broken down and decentralised. Depart-ments are charged interest on

to decline since. Reacting with conventional Few other Arabian trading pay depreciation on their own discovers that his wife ha logic, the company's managers groups study their markets in equipment and they pay their rung by a strange man.

Court of Appeal (Sir Jnhn Donaldson, Master of the Rolls, Lord Justice Lloyd and Lord Justice Nicholls): December 5 1986

THE DECISIONS of a solf-regulating body without statutory or contractual source of power are subject to review by the court if the body performs a public duty; but the court will be reinc-tant to interfere in the body's findings of fact and will reject an application for review if the decision was not reached by illegality, irrationality or procedural impropriety. The Court of Appeal so held

when refusing an application by Datafin plc, an English comby Datann pic, an English com-pany, and Prudential-Bache Securities Inc of New York, for judicial review of a decision by the Poncl on Take-overs and Mergers that the Kuwait Invest-ment Office (KIO) and Norton Opax pic, an English printing company, had not acted in con-cert in breach of the City Code cert in hreach of the City Code on Take-overs and Mergers in respect of the take-over of McCorquodale pic, another printing company. SIR JOHN DONALDSON said

Six JOHN HONALDSON said that the Panel on Take-overa and Mergers was an unincor-porated association without legal personality. It had about J2 members, the chairman and deputy chairman being appointed by the Bank of Eng-land. It had no statutory, prerogative or common law powera and was not in contracpowera and was not in contractual relationship with the finan-cial market or those who dealt in that market. Cut

It was a self-regulating body in the sense that a group of people, acting in concert, used RESPOND their collective power to force themselves and others to comply C, a company TEREST OF with a code of conduct of their own devising.

Lacking any authority de jure BOLING B it exercised immense power de facto by devising, promulgating, 15 per let: at the mint amending and interpreting "the City Code on Take-overs and en meine 1911 Barris Mergers;" by waiving or modi-2 RJ.2 6 fying the application of the Code in particular circum-÷. stances; by investigating and reporting on alleged breaches Tinds Web · Camer, E. of the Code; and by the applicaback atter tion or threat of sanctions, The principal issue in the present appeal was whether this remarkable body was above the 1.00 1.000 law. Its respectability and bona fides' were beyond quesi. ....

tion. The hackground was that in 1986 competing offers for McCorquodale were made by Norton Opax, and by Datafin backed by Prudential-Bache.

Consistently with the Panel's declared intention of doing equity between one shareholder and another, the Code con-tained rules which prevented an or understanding between KIO and Norton Opax leading

dismissed. Datafin and Prudential-Bache

sought leave from Dr Justice Hodgson to apply for judicial review of the Panel's decision. The judge refused, indication that the court had no jurisdiction. The application was renewed to the Court of Appeal which gave leave because the

issue as to jurisdiction seemed arguable. In December 1983 the Department of Trade and Industry made a statement explaining why the Licensed Dealers (Conduct of Business) Regulations 1983 (SI No 587) contained no detailed provi-sions about take-overs.

sions about take-overs. It said that with regard to public companies and private companies which had some kind of public involvement "The Department considers it best to rely on the effectiveness and flexibility of the City Code on Take-overs and Mergers." It saw the City Code as an important safeguard for the shareholders of the public shareholders of the public company ... and as a means of ensuring that takeovers are conducted property and fully in accordance with the provi-

sions of the Code." As an act of government it was decided that, in relation to take-overs, there should be a central self-regulatory body which would be supported and sustained by a periphery statutory powers and penalties wherever nop-statutory powers were insufficient or non-existent. where EEC requirements called for statutory provisions. The issue was whether the supervisory jurisdiction of the courts extended to such a body discharging such functions, including some quasi-judicial

in nature. Mr Alexander, for the Panel, submitted that it did not. He said the jurisdiction extended only to bodies whose power was derived from legislation or the

exercise of prerogative, In Regina v Criminal Injuries Compensation Board, ex parte Lain [1967] 2 QB 864, 884, Lord Diplock said that the High Court's jurisdiction to supervise Inferior tribunals "has not in the past been dependent on the source of the dependent on the source of the tribunal's anthority ... except where such anthority is derived from agreement of parties to the determination." The Crimical Injuries Board, in the form which it then took, was an administrative negative. was an administrative novelty. It would have been impossible to find a precedent for the exercise of the supervisory jurisdiction of the conrt which fitted the facts. Nevertheless,

the court not only asserted its jurisdiction, but further asserted that it was a juris-diction which was adaptable thereafter. That process had been taken

It was performing an impor-tant public duty. That was clear from the expressed willingness of the Secretary of State for The complaint was further Trade and Industry to limit considered by the Panel which legislation in the field of take-also beard evidence, and was overs and mergers and to use overs and mergers and to use the Panel as the centrepiece of

regulation. The rights of citizens were indirectly affected hy its decisions, and in its determination of whether there had been a breach of the Code it had a duty to act judicially. Its source of power was only partly based on moral persuaslon and the assent of institu-tions and their members, the bottom line heing the statutory powers excreised by the Department of Trade and Industry and the Bank of England.

In that context it would be very disappointing if the courts could not recognise the realities of executive power and allowed their vision to be clouded The court bad jurisdiction to entertain applications for the judicial review of decisions of the panel.

the panel. A special feature of public law declsions was that they sub-sisted and remained fully effective unless and until they were set aside by a court of competent jurisdiction. The Panel and those affected should treat its decisions as valid and binding unless and until they were set aside. They

should ignore any application for leave to apply for review, since to do otherwise would enable applications to be used as a mere ploy

If the Panel found a hreach of the rules, there was an internal right of appeal which must be exercised before the court would consider intervening. Where, as in the present case, the complaint was that the Panal should bave found a breach but did not do so, the court would be even more re-luctant to move in the absence

of any credible allegation of lack of bona fides. It was not for a court exercis-ing judicial review to substitute itself for the fact-finding trihunal. The Panel and not the court was the body charged with the duty of evaluating the evidence and finding the facts.

The court's role was to review the Court's role was to review the Panel's decision and to con-sider where there had heen an "illegality," ie whether the Panel bad misdirected itself in law; "irration-ality," ie whether the Panel's decision was so outrageous in its defiance of logic or accepted moral standards that no sensible person who bad applied his mind to the question could bave arrived at it; or "procedural impropriety." is a departure by the Panel from any procedural rules governing its conduct

The present application was rejected. The Panel had approached the matter on the basis of the 'definition of "concert party" in the Code rules, which required a finding on the evidence of an agree-ment or understanding. There was no such evidence, or none

# Creditors have prior interest in company's house

WINKWORTH V

EDWARD BARON DEVELOP-MENT CO LTD House of Lords (Lord Keith of Kinkel, Lord Templeman, Lord Griffiths, Lord Mackay of Clash-fern and Lord Ackner): December 4 1986.

DIRECTORS WHO occupy a company house as licensees regarding it as their matrimonial bome, and who pay the company the proceeds of sale of their former bome in part settlement of improperly incurred dehts unconnected with the purchase of the company house, do not thereby acquire an equitable interest in the property entitling them to retain possession with priority over the company's creditors.

The House of Lords so held when allowing an appeal hy Mr Winkworth, mortgagee, from a majority Court of Appeal decision (Lord Justice Kerr dissenting) that Mrs Wing hed acquired an equitable interest in a bouse owned by the com-pany, Edward Baron Develop-ment Company Ltd. prior to the legal charge acquired hy Mr Winkworth.

LORD TEMPLEMAN said that bome.

the company's issued share capital consisted of two shares. One was transferred to Mr Wing and the other to Mrs Wing for 115,000. The purchase price was extracted from the com-pany's bank account. Mr and Mrs Wing became sole directors.

\*

The company acquired pro-perty at Hayes Lane, Becken-ham, Kent. It paid £70,000 for the property and £12,000 for payment into the bank account. fixtures and fittings and inciden- On August 26 1981 Mr Winktal expenses.

tended to transfer to themselves when the company had been reimbursed for its expen-

diture. Mr Winkworth claimed to he mortgagee of Hayes Lane. His claim was resisted by Mrs Wing. Mr Gerald Godfrey QC, sitting as a deputy Chancery judge, ordered Mrs Wing to deliver up possession to Mr Winkworth. By a majority, the Court of Appeal reversed his decision on the ground that Mrs Wing had obtained an equitable interest prior to Mr Winkworth's charge. Mrs Wing left the company's affairs in the hands of her husband. After taking control of the company and paying for the shares out of its bank account, Mr Wing drew further cheques on its account for a washing machine, motor car and jeweilery. He instructed company's solicitors to hold the title decds of Hayes Lane to the

order of the bank. He intended that the company would raise f70,000 on a mortgage of Hayes Lane to a commercial lender, and would then pay off the bank ovedraft out of the mortgage money.

Mr Wing did not confide that intention to his wife because she would not bave agreed to a mortgage of the matrimouial

joint tenants. The balance of proceeds of sale, amounting to £8,601, were paid into the com-pany's bank account, thus reducing the overdraft from £16,760 to £8,159. Mrs Wing authorised

Mr and Mrs Wing went into company. The charge was regis-occupation of Hayes Lane, which they regarded as their matri-monial home and which they in-Wing's signature had been forged by Mr Wing.

The company, having been stripped, declined into insolvency and went into liquida-tion in 1953.

It was now contended by Mrs Wing that the payment of £8,601 into the company's bank account In November 1980 obtained for her an equitable interest in Hayes Lane in the proportion that £8,601 bore to £70,000 and that her equitable interest took priority over the claims of the company's creditors, secured debts. and unsecured.

The argument exploited the equitable doctrine that a legal owner beld in trust for the persons who contributed to the purchase price of the property or made contributions referable to the acquisition of the property.

The £8,601 paid into the com-pany's bank account from the pany's bank account from the proceeds of sale of The Drive reduced the company's over-draft which was secured by the solicitors' undertaking to bold the Hayes Lane title deeds to the order of the bank. There-fore it was cald the automatic

fore, it was said, the payment was referable to the acquisition of Hayes Lane by the company, and equity required the com-pany to bold Hayes Lane in trust for the company and for Mr and Mrs Wing, or one of them

The simple answer was that the payment of £8,601 was not referable to the acquisition of Hayes Lane, which had already been bought and paid for in full. There was no connection between the payment for Hayes Lane and the incurring of the overdraft. There was no connection between the acquisi-On August 26 1981 Mr Wink- tion of Hayes Lane and the worth advanced £70,000 to the payment of £5,60L

Mr Wing was responsible The proper inference to he drawn from the admitted facts for the company's insolvency. was that Hayes Lane and the Mrs Wing was not aware that £8,601 pald into the company's bank account hecame assets of duty to the company or its the company managed by Mr creditors. But in view of ber Wing for the benefit of bimself failure to discover and exerand Mrs Wing as sole and equal cise her powers as a director shareholders, not as owners of so as to ensure that the com-equitable interests. pany's effairs were properly

Equity would not intervene to confer on Mrs Wing an interest in priority to creditors because her husband, without ber knowledga, impliedly agreed to charge the title deeds of Hayes Lane with the repayment of improperly incurred

Equity operated on conscience but was not influenced hy sentimentality. A company owed a duty to its creditors, present and future. The con-science of the company, as well as its management, was con-fided to its directors. A duty was owed by the directors to the company and to the credi-tors to ensure that its affairs were properly administered, and that its property was not dissipated or exploited for the benefit of the directors to the prejudice of the creditors prejudice of the creditors.

Mr and Mrs Wing committed breach of their duty to the company and its creditors when £115,000 was withdrawn from its account to pay for their shares and when the overdraft was in-curred and increased for their benefit. When Mr and Mrs Wing paid in the £8,601 their liability to the company and its creditors far exceeded that sum.

When the company received the £8,601 its conscience did not require it to confer on Mrs Wing an interest ranking in priority to the claims of

as a director she owed any conducted, equity would not compel or even allow the company to hold part of its property on trust for her, to the detriment of and in priority to the claims of creditors. It was submitted that even

15

if Mrs Wing bad no equitable interest Mr Winkworth could not enforce a forged legal charge.

The company must either admit the validity of the charge, or provide a new legal charge, to which Mr Winkworth was clearly entitled. The liquidator had sensibly conceded the validity of the existing legal charge. That was now binding on the company and enabled Mr Winkworth to exercise the powers conferred by it so as to obtain possession against Mrs Wing.

The appeal was allowed. Lord Keith, Lord Griffiths, Lord Mackay and Lord Ackner

agreed. For Mr Winkworth: Andrew

Morritt OC ond Dorid Parry (Parlett Kent & Co). For the liquidator: Alan Word QC ond Peter Rolls

(Clemence Turner & Henry). **By Rachel Davies**

### Samson/Covent Garden

### **Max Loppert**

. . .

Samson returned to Covent fluidity, but the fidgety, fussy Garden in 1985, the Handel cen-tenary year, as the company's interesting ideas in Moshinky's contribution to the London celes contribution to the London celeviaw of the work suffer. There is less untidy bustle in Act 3, hrations. It was a fairly dire is less initialy busite in latt of and the Jewisb funeral rites are movingly accomplished. On Monday Norrington struggled to exact from the orchestra the lightness and clarity of articulation to which his more wall remembered Hapform of tribute: Jon Vickers,

massively weighing into the title role, and Julius Rudel, in feeble charge of the pit, did most damage. Now there is a his many well-remembered Han-del performances in other places further run of Samson performfurther rim of Samson perform-ances, with a less self-absorhed and sententious leading tenor, Robert Tear, and a noted Handel conductor, Roger Nor-rington. The edition used is faithful, the executive style somewhat less far from the mark. The Royal Opera Somson is still a faiture—but at least it is now an honourable faiture. Somson, an oratorio unin-tended for these stage pur-poses, could hardly hope to suc-ceed here; the forms and the pulse beats of the music run counter to the demands placed on them for most of the way counter to the demands placed on them for most of the way, and the need for "filing-in" to to make up the difference be-momes uncomfortably pressing. Last time around, the Elijah Moshinksy production won a benefit-of-the-doubt rating simply in view of the musical disadvantages assure which it disadvantages against which it was having to struggle. This time, the situation is largely different. Trollies are trollied, and screens slid across the stage

bave accustomed us. At first, during a very spottily played overture, it seemed a struggle already lost. But gradually, and in spite of the unsuitability of the bouse and the producer's of the bouse and the producer's unhelpful chorus siting (which positively invites poor en-semble), his efforts began to hear fruit. From the sublime funeral music to the blaze-of-light D major close, well handled by Moshinsky, the sweep of the performance was at last anthentically Handellan —and this in defiance of all the many things, in the performance many things in the performance that could not he so described. Tear, as ever a passionately committed Handel singer, makes no attempt to exert his

turn visit.

slow to speak (sharper conso-nants would help); a hrighter, "quicker" sound is properly called for. The gentle youth Micah, transformed here into a serving woman (why?) finds Sarah Walker in nobly eloquent mood hut in marginally less full voice than previously. Although this is hardly a "show" to be recommended to the general public, Handelians will no doubt want to pay a re-turn visit.

Carol Vaness and Robert Tear emotional charge is fervent Israelite women (and thus "Let from the start, and develops with admirable certainty--the decisive yet gentle air dis-covered in "Tbus when the namts would help); a hrighter, sun" sets the seal on an intel-ligent artist's response to a called for. # Penn & Teller/New York

### **Michael Coveney**

The most exciting and im-portaot non-fiction programme on television at present in The New Enlightenment, a six-part series which reaches its penultiseries which reactes its pendit mate episode on Channel 4 at 8.30 this evening. The subject is political philosophy. For the first time on television, so far as 1 am aware anyway, we have bere a series which not only describes one particular line of political thought, but openly It bas often been argued in this column that until television this column that until television takes unto itself the right to screen politically committed programmes (or philosophically or religiously committed pro-grammes) the medium cannot consider itself properly grown up. We know from 500 years of print that while a striving after balance and objectivity leads to one admirable sort of journalism, there is another

16

espouses lt.

journalism, there is another sort — also essential in a truly

sort — also essential in a truy free society — which depends upon the right to be biased, the right to adhere to one view and reject others, the right to proselytise.

Until the appearance of Channel 4 "objectivity" was the rule in virtually all British

television journalism. This meant that when current affairs

programmes covered, say, some burning social issue, " halance "

time to representatives of different political parties. Since

all main political parties in

post-war Britain bave favoured,

to a greater or lesser extent, the perpetuation of the welfare

state, this often made for a type of television journalism which would scarcely have been regarded as "halanced" by a

visiting Martian. Nevertheless the system could be expected to produce a

roughly fair representation of the spectrum of British political

opinions. The only trouble was (is) that within the televisida

system most of those having aoy power to choose where-ahouts to put the fulcrum to acbieve this balance happen to have views slightly to the left

of centre, or that is my

one which, three years ago, But it is some indication of

Interesting and important though these series have been, the results have not heen dramatic: it has been as though the degree to which television has been emasculated, and some confirmation of the normal left-wing dominance of current affairs, that one felt quite sbocked even to haar hints of television had at last ecquired a correspondence column, comthis on television. The same applied to a number of points bining letters from The Guardian and the Daily Teleabout racial groups made in Programme 3: that Jewish and Chinese immigrant communities graph, and a feature page, com-bining work from The Times and the Morning Star.

in the US with long traditions of family logalty and a power-ful belief in self-help have pros-pered and joined the highest The New Enlightenment is more important. Made by Diverse Productions, the com-pany responsible for Diverse per-capita income groups in the pany responsible for Diverse Reports, produced by David Graham and Philip Clarke, and presented by Kenneth Minogue of the LSE, it puts together his-tory, philosophy and contem-porary politics to show how a particular type of political thought, that of John Locke and Adam Smith is starting to be

Adam Smith, is starting to be of importance once again not only in Britain and the US, hut increasingly in other parts of Europe, in India and even in Cbina. Programme 1 described the chain of events which led from Frederick Hayek's "The Road to Serfdom" to the founding of the Institute of Economic Affairs, the formation of the

urged the privatisation of bua

country, while black and Irish communities, relying more upon political activities, bave fared much less well. In the age of "Baz Baa Green Sheep" when it is taboo even to imply the existence of racial distinctions such outspokeness; is almost such outspokenness is almost hreathtaking. Programme 4 was bolder still. declaring that "Profit is the signal that an entrepreneur is directing his energies in the right way and making things that people want." Programmes 5 and 6 declare that even gov-ernments have to earn their people want, and that if they pitch their prices mo high

Comment allows time for indivi-duals to make opinionated statements; Right To Rcply supplies the means for viewers o criticise television's own output, and Diverse Reports provides for half-hour current affairs programmes to be created with a specific point of view. These have ranged from an anti-royalist programme to

The right to be biased the Finland Station, and of placa to another, life for indi-course we should beware the vidual Africans today can he selective use of hindsight to create a spurious sense of sig-nificance. That said, I for one The point I want to make is not be the tot the tot the tot is wholl a

create a spurious sense of sig-nificance. That said, I for one bad never before seen the his-torical connection between Thatcher and Reagan so clearly delineated. Near the start of Programme Near

petual growth is a good or even possible thing. One might ask how you de-regulate the law of Edinhurgh woman who bas given hirth to two children fathered by the same man, whom she bas not married. The how you deregulate the law of contract governing employment without finding yourself straight back in Dickens' black-ing factory, and whether you can really give freedom to the entrepreneur without promptly having the Green Belt covered in computer factories. If the answer is that government re-gulation would still he necessary then are we not talking about a mere modification to the exist-ing aystem rather than the whom she bas not married. The commentary made the point that in a previous age social pressures would probably bave ensured a marriage and thus support for the children, but that today the woman is able to make another choice: to live off the state. It was hard to assess what damage the welfare state the state. It was hard to assess what damage the welfare state bad done to the Britisb spirit of independence, aaid Minogue. Anybody wbo has stood in a puh or a bus queue in the past 25 years knows that this sort of comment (often put more crudely: "What gives ber the right to live off us?" etc) is utterly commonplace. But it is some indication of ing aystem rather than the change in principle that seems to be implied throughout the series?

Those assertions about the dehilitating effect of welfare programmes, the efficacy of family effort, the sheer needfamily effort, the sheer need-lessness of much government activity (tonight's programme reveals that Swiss MPs sit only 12 weeks of the year and re-12 weeks of the year and re-ceive no salary, only expenses), the relative benevolence of colonialism, and so on, are not necessarily right. But nor are they necessarily wroog—and that is the point. The New Enlightenment bas broadened the political grammar that is per-missable on television.

To dismiss the series (many have) as extreme right wing propaganda or Tbatcherism writ large is surely to misunderstand not only the programmes hut the Thatcher government. Even within my own small area of experience—the world of teleexperience—the world of tele-vision—this administration has proved itself ready to interfere at every level: moral, technolo-gleal, legal, financial, journal-istic. A more interventionist government would be difficult to imagine, whatever its connec-tions with the noninterren

people want, and that if they pitch their prices too high things go wrong, as in Italy where taxpayers opt out and join the black economy. In the final programme caution is thrown to the winds and Prof.

#### **CEMENT** Jim Jones reports on the low ebb of confidence among Johannesburg industrialists S African cement cartel gives little comfort SOUTH AFRICA'S longer-term factory which, in turn, ensures economic malaise is well sum-med up in the state of the R500m mised. On the other band, the is hampered by an oversupply thermal power station. The of white bousing. Higblands scheme will stert white emigrants exceed only two or three yeers from S. AFRICA - CEMENT Million Ions (\$157m) turnover cement in-dustry, it is dominated by e White emigrants exceed cartel has probably belped to now and first phese construction will be spread over seven years. Industry executives agree dustry. It is dominated by e exclude newcomers from the cartel of producers; government business. The last company to is tinkering ineffectuelly with enler the South African merket the industry's operating en-was Holderbank, and it came vironment and regulations; into the country half a century confidence is affected by per-site and regulations and the country half a century and the country half a century and the country half a century confidence is affected by per-12white immigrants at present, while tha general leck of confidence bas persuaded white South Africans to steer clear 10- Capacity\_ of buying fixed assets. The mood

sistent rumours of divestment; large quantities of production cepacity—some neerly new— are in mothballs; capital spend-ing plans are non-existent and likely to remeln that wey for several years; and demand from the industry's principel cus-tomers is responding sluggishly to economic stimulation from

Like many other industrial sectors, the South African cement industry is exclusive. The three players — Pretoria Portland Cement (PPC), which is a subsidiary of the Barlow Rand group, Anglo-Alpba, which is cootrolled by Holderbank, the Swiss group, end Blue Circle, which is jointly controlled by Blue Circle Industries of the UK and Geneor, the big mining UK and Gencor, the big mining house—have openly operated as a tightly managed cartel aince

PPC has 45 per cent of the market, Anglo-Alpha has 35 per cent and Blue Circle 20 per cent. In addition, they jointly own Netal Portland Cement (NPC), which operates a small factory in Natal. The companies claim, with some justification, that the cartel has benefited customers. Cement factories need to be located next to limestone deposits, and the most sultable ones lie in the northern Cape, the western and eastern tons a year Dwaalboom plant Cepe, the western Transvaal and immediately mothballed it. and south Nstal—all remote Blue Circle is the worst bit

Three years ago the Govern-ment lifted price controls on cement. Now it is preparing to prohibit the producers' cartel. That does not seem to worry tha That does not seem to worry tha companies since formal agree-ments will inevitably turn into informal ones. Mr Trevor Coulson, Blue Circle's manag-ing director, believes that when the cartel is abolished one price leader will emerge, as is tha case with many other South African industries, and that it will set prices which will be followed by the others. The cartel arrangement did

The cartel arrangement did help combat dumping of Japanese cement in Natal last Japanese cement in Natal last year, yet it has been largely powerless to protect the pro-ducers from the worst recession in decades. At the start of 1986 the industry had an installed capacity capable of 11.9m tons. of cement e year, but it does not expect to operate at much more than 60 per cent of full cenacity for the year as whole cepacity for the year as a whole, All the wet process kilns ere closed, and they will be the last to re-open as they are compara-tively oid and their operating costs are greater than those of dry process kilns. The industry's capacity problems were thrown into relief in June 1985, when PPC commissioned its 600,060

8-2-

Mr Coulson tries to be philomarket. But his company's cement plants are producing et only half of their capacity, salea will be 5 per cent lower this year than in 1985, be expects no increase in sales in 1987 end only armette a 2 mer cent only expects a 3 per cent Increase in 1988 and 4 per cent in 1989.

CALENDAR ITAR

1978

1986

Mr Johan Pretorius, Anglo-Alpba's group managing director, is more optimistic. He expects demand to rise by 4 per cent in 1987 and by a further 5 per cent in 1988 before levelling out in 1989 and declin-ing in 1991. On the other hand, Mr Charles Hollmann, PPC'a commercial director, is budget-ting for a solid director, is budgetting for a sales drop to 2.75m tons in 1987 from an expected 2.9m tons in 1985.

These comparatively dismal forecasts are supported by out-side analysts. Stellenbosch University's Bureau for Eco-Cepe, the western Transval and immediately mothballed it. and south Nstal-all remote from the country's main industrial areas. Within the constraints of market share, the cartel ensures that customers are supplied with cement from the nearest the old plant into mothballs. Blue Circle is the worst hit in terms of capacity utilisation. It commissioned a 1.1m tons market share, the cartel ensures that customers are supplied with cement from the nearest the old plant into mothballs. Stere in the struction is struction report that the build for residential building work is budgeted at less than a new shareholding.

will almost certainly change, but it is not clear when that will be. Earlier this year the Government announced plans to push about R750m into economic housing for hlack people.

That sum does not particu-larly impress the cement pro-ducers. According to industry figures, residential housing con-struction absorbs only about a quarter of the country's cement Droduction of the country's cement production, so the Government's bouse spending plans are probably too narrowly focused to have a great effect on the cement industry.

Nor do the producers believe thet all of the ambitious engineering projects announced by eering projects announced by the government in recent months will necessarlly bave any appreciable early effect on cement sales. The Higblands Water Scheme, which will divert rivera rising in Lesotho through a series of dams and tunnels from Lesotho to South Africe's rivers, and the Mossel Bay offshore gas project will

Bay off-shore gas project, will provide some demand for cement. However, that demand will he spread over ten yaars or longer.

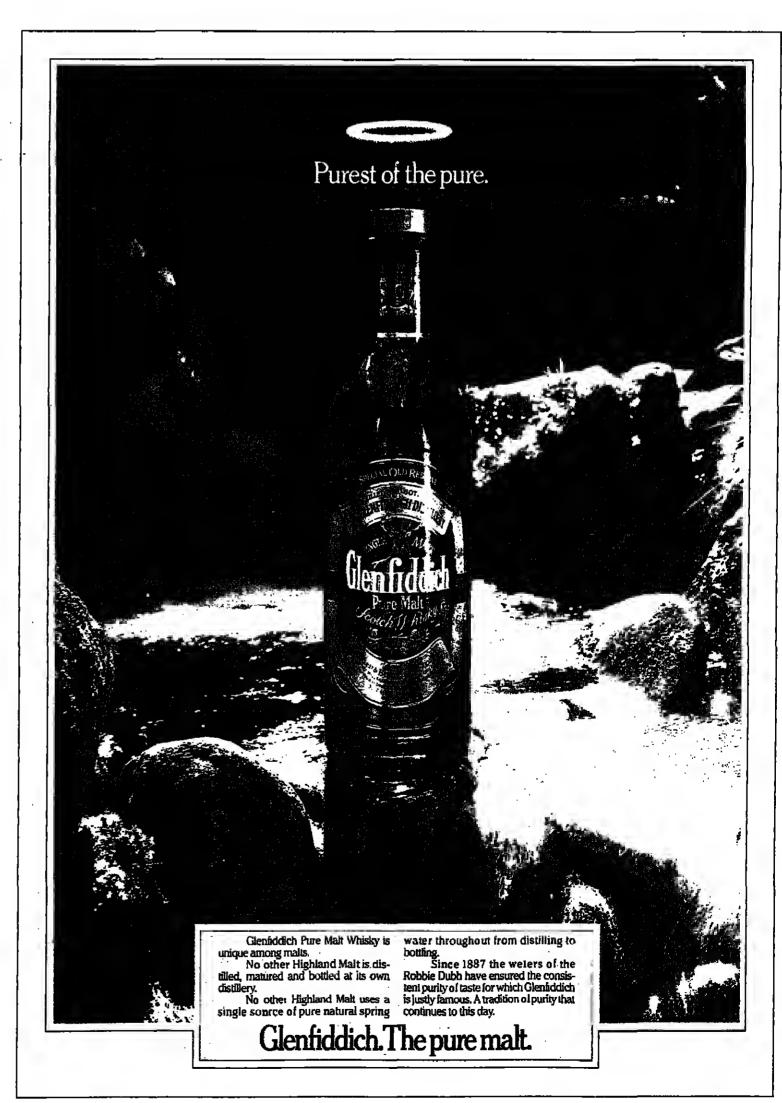

As Mr Coulson sees it, a gen-eral economic recovery which revives construction on a broad front is needed to lift cement demand to a level at which the producers could return large parts of moth-balled capacity to production. But that, he be-lieves, will certainly not hap-pen in the next 13 to 24 months.

Industry executives agree that no further expansion of capacity will be planned until annual production reeches et least 9m tons. The industry has 27 kilns available for produc-tion of which 20, representing 90 per cent of total capscity, are dry process and the re-mainder wet process. The every mainder wet process. The ever-age age of the dry kilns is 11 The recession has made the industry far more cautious than before. It wants to see a real recovery in the construction industry and certainty over longterm projects, such as road conterm projects, such as road con-struction, before committing itself to new plant. The last round of expansion, which cul-minated with Dwaalboom's immediate moth-balling, was planned back in 1980 when the industry was continually oper-eting at more than 85 per cent of production capacity and the building and construction indus-tries persistently and ominously warned of coment shortages.

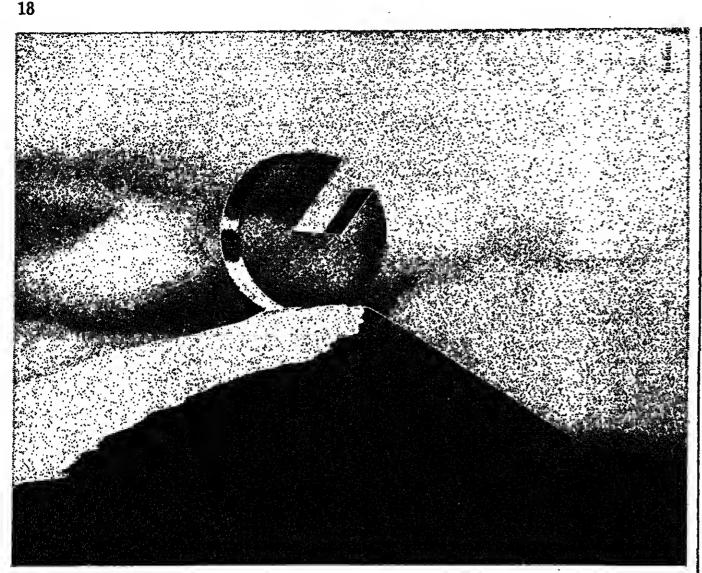

warned of cement shortages.

warned of cement snortages. Those were tha days wheo gold was briefly touching \$800 an ounce, economic forecasters were predicting that the world recession would pass South Africa by, the cement producers were exporting to pre-Khomeini Iran and the local construction industry was expecting a boom in bouse building for black South Africans. South Africans

Gold's decline and the Government's ill-fated anti-inflationary austerity measures killed confidence. Now attention is focused on Blue Circle. Its

Brunei tightens grip on LNG output

#### BY STEVEN BUTLER IN BANDAR SERI BEGAWAN

THE BRUNEI Government, which has been fully inde-pendent for just two years, has taken a significant step towards controlling the exploitation of the country's natural resources, with the purchase last week of majority shareholdings in two hig liquefied natural gas ventures. The share purchases in Brunel LNG and Brunei Coldgas follow two years of complicated negotiations with Royal Dutch/Shell and Mit-

has been disclosed.

raised locally.

banks.

The Government also The Government also announced the formation of a new company, Brunei Shell Tanker, a 50-50 joint venture with Shell Tankers. The new company has purchased seven 75,000 square metre capacity LNG tankers from Shell Tankers. The tankers are used for the transport of LNG to Janan, and they will combine Japan, and they will continue to be managed by Shell Tankers under contract. The Government said that

while the 50-50 ownership of Brunei Shell Petroleum was unaltered, a restructuring of arrangements between Sbell and the Government will result in greater use of services supplied within Branel. Branei Shell Petroleum ex-plores for and produces oil and gas in Brunel, and oper-ates a 10,000 barrel per day refinery.

The impetus for the changed ownership of the LNG companies cama from the anticipated expiry of a 20 year LNG supply contract with Japan in 1993, under

which Branei exports 5m tonnes of LNG per year. The Government said the new arrangement would provide a "secure and stable foundation" upon which the company would continue to export gas after the current contract expires. The Government evidently made restructuring the companies a condi-tion for continuing the contracts.

production of Brunei's erade oil is expected to aver-age 165,000 barrels per day this year. Gas sales are expected to average 750m stan-dard cu ft per day.

subishi. The two big foreign partners each previously held a one-third stake in each pro-

ject, and the Government has bought shares in equal measure from both. No price

# **JOBS**

# How organisations lose touch with reality

BY MICHAEL DIXON

"BEWARE," said the poster in big red letters. The sketch below showed a

The sketch below showed a bespectacled pin-striped gent with bowler hat, rolled umbrella and official briefcase. He was looking indignant. Trying to whisper in his ear was another man, bare-headed and dressed not unlike a typical taxpayer. Under the sketch wera the words:

words: "People outside your depart-ment may sometimes ask you for information about your work. Do not answer them!"

The poster just described was prominently on show in the offices inhabited by Britain's Department of Education and Science in the lete 1960s, When the department later moved to hew premises the poster was evidently left behind. I don't know whether it is still dis-played in the old building, which now reputedly houses MTS. MI5.

MI5. But if the American historian Arthur Schlesinger is right there never was nor will be displayed in the offices of hureaucracies, governmental or there the staff of such organi-sations will leak information if they think it helps their cause, in other respects their urge tn but do their jobs. As a result they become so procompied with the operations of the internal system that they assume that its rules epply everywhere. Provided they are ores, no one outside the organi-sation has a right to interfere. In short, they hecome autistic: cut off from, if not contemp-thous of, the external world. while the stand of 
His words ring so true that as impersonal rules replace in-the urge for secrecy and its not always productive consequences An example of how the law's seem to cry out for inclusion in the laws of organisational stupidity, the first I6 of which were outlined in this column on September 4 and Octoher 29,

My inquiries into the "imper-ative," and its associated concentration on appearance to the neglect of reality, persuade me that its root lies in the idea that bureaucracies ara an evolu-tionary stage above other types

tionary stage above outer types of organisation. The doings of the more primi-tive kind tend to be determined by the judgments of fallihle human individuals whose hearts are apt to rule their heads. But hureaucracies are supposed to hureaucracies are supposed to operate according to virtually scientific principles and pro-cedures laid down in advance, which their staff need only to served. follow precisely and dispassion-ately to do their jobs.

no excuse. effacts can riddle an organisation from top to bottom has been presented to me over the

past few days by British Rail. The saga began when I arrived at my local station three minutes early for my train to work—a journey scheduled to take under half an hour. Since reporting staff on morning newspapers start and finish later than most people, I qualify for a return ticket at a cheep rate. The booking office hes two

About six of us were still without tickets when the train drew in, most unusually, on time. On arriving at London's Can-

On arriving at London's Can-non Street station I asked to be suoplied with the return ticket I had heen unable to obtain at the outset. But the official at the station barrier replied that I could not have the cheap rate because "not having time to get a ticket is no excuse."

Sloce no oce had said such a thing to me since my school days, I was somewhat nettled. Sloce no ooe had said such not enchle it to provide an effi-a thing to me since my school cient ticket-sales service. But days, I was somewhat nettled. since—when viewed from the So I wrote to Mr Chris Green, inside—the internal rules can-the bead of the relevant section not be wrong, the only way to of British Rail who is reputedly counter the inefficiency is to an expert in marketing and cover it up by ruling that it is communications, inquiring why the external world's fault.

he had not communicated to his staff that the customer needs A fortnight later I received a reply, not from Mr Green himself, but from the regional

customer services manager. He explained that, except on Mon-day mornings, only one ticket window was open at my local station "as this is appropriate for the usual demand." The "revised excess fare arrange-ments, which have been widely advertised " banned the issue of cheap returns to passengers failing to get them at their starting point unless the station was not issuing tickets at all.

If I felt that the ticket queue was excessive, I might appeal with the facts to the local area chief for a refund. Otherwise, while the customer services manager could not condooa the barrier official's rudencss in telling me that not having time to get a ticket was "no excuse." the fact was that it was no

excuse. There could surely be few better instances of the Bureaucratic Blinder in operation. Tha reality is that the accustored procedures of British Rail do not enchle it to provide an effi-

dam.

The trouble is that, although it is evidently very easy for organisations in become subject to the law, they do not seem to he able to get free of it without considerable pain.

Oddly enough, just before the ticket saga I was talking to the personnel director of one concern which appears to have escaped: Jaguar Cars. He said that the company as a whole had now learned that the exter-nal customer's wants override internal convenience, but only at the price of losing 40 per cent of the workforce. One wooders how much it will cost British Rail to absorb the same

### Go getter

HEADHUNTER Tony Nevile seeks a director of business development for an international financial group with more than 200 offices in 50-plus countries. As he may not name his client, he promises to abide by any applicant's request not to be identified to the employer at this stage.

The prime task is to identify and exploit new business oppor-tunities all over the world. So there will be extensive travel and it evidently does not much matter whether the newcomer is based in London or Amster-

Besides demonstrably having skills in commercial manage-ment and marketing, candidates need knowledge of financial and management consulting, auditing and taxation. A relevant degree or professional qualification is also desired.

The salary indicator is £40,000-plus, with other benefits negotiable.

Inquiries to Anthony Nevile International, 31 Castle Street, Farnham, Surrey GU9 7JB; tele-phone 0252 711311, telex 858902 Baron G.

### Consultants

THREE ASSORTED manage-ment consultants are wanted for the staff of the Cardiff-based IMC consultancy. One will specialise in marketing executive selection services as well as personally providing them. The second will do the same in the management development field. The other will be a general management consul-tant with particular strength in finance. Candidates should have successful experience in similar work.

Basic salaries £20,000 up-wards, again with negotiable perks.

Inquiries to IMC's chief executive Alan Rosser at 6-8 Albany Road, Cardiff CF2 3RP; tel 0222 486051.

# International Equities: **Research and Sales**

SBCI is the London-based investment banking arm of Swiss Bank Corporation. It has enjoyed exceptional growth since its foundation in 1980 and its operations now extend to New York, Tokyo, Frankfurt and othar financial centres; an office will shortly be opening in Amsterdam. Backed by the financial standing and capital strength of SBC we aim to play an increasingly important role in tha global securities market. The bank has recently strengthened its equities capability in tha Far East, and is now seeking a number of experienced analysts and salespeople to increase its penetration of the French, Dutch, German and Swiss markets.

- Applicants for the Analyst positions should have a minimum of two years' experience following their particular market, with both verbal and written fluency in the language concerned.
- Applicants for the Sales positions should also have a minimum of two years' experience which should have been gained either in one of the relevant European markets, or through servicing the requirements of continental European institutions for UK or US stocks.

There are excellent prospects for career progression. Remuneration, which will include a first class range of investment banking benefits and the opportunity to earn a substantial bonus, is negotiable. Those who wish to apply should write, enclosing a curriculum vitae, to Alexander Campbell, Manager, Swiss Bank Corporation International Limited, Three Keys House, 130 Wood Street, London EC2V.6AQ.

# Strategic planning

### An important appointment within Lloyds Bank.

Acquisitions, divestments, new investments and other major decisions at corporate level are central to the future development of Lloyds Bank.

20

Influencing these decisions through project appraisal and analysis is a responsibility of the Strategic Planning Unit.

We are looking to strengthen our high quality, City based Planning Team with an additional Manager or Assistant Manager. The level of the appointment will depend on the experience of the individual.

An MBA with two to four years practical work experience and fluency in corporate finance and valuation analysis is the most likely profile.

Success will be recognised and rewarded with rapid promotion and subsequent career development opportunities within other areas of Lloyds Bank's world-wide operations.

A commensurate salary is offered plus a full range of valuable benefits.

Please write, enclosing a copy of your CV and current salary, to:

Peter Bareau General Manager Strategic Planning Unit Lloyds Bank Pic Bow House 74 Cheapside London EC2V 6EE.

### A THOROUGHBRED AMONGST BANKS.

# **General Manager**

# up to £40,000 pa

# Can you really manage people and change?

As one of the key and highly visible arms of The Stock Exchange, the Quotations Department is central to the regulation of the market and the protection of investors. It is being developed and reorganised.

The Department is responsible for the admission of companies to listing and the continual update of information likely to affect share values of listed, USM and Third Market companies, thus controlling compliance with listing requirements. These are highly specialised activities which already have excellent policy and technical support and employ 125 professional and administrative staff.

We now need an outstanding manager of people to drive the Department's activities forward.

This is an opportunity to make a significant contribution to the effective management and overall promotion of this Department, joining the management team at a senior level.

You are likely to be aged 35-45 and a graduate and you must have a proven track record of general managerial achievement, particularly in change or development situations, gained in a

large financial, industrial or commercial enterprise. Your skills in organisation, control and communication will enable you to take up a key role in the department in a period of evolving global financial markets.

Salary will be negotiable to \$40,000, plus car, non-contributory pension scheme, six weeks' holiday, travel assistance and private health scheme.

Please write in strict confidence with full career details to:

Mrs Rhiannon Chapman, Head of Personnel, The International Stock Exchange of the United Kingdom and the Republic of Ireland Limited, Old Broad Street, London EC2N 1HP.

# FASIIRER

The Woolwich has taken a leading role in establishing the presence of building societies in the sterling markets. With the increasing importance of wholesale funding and the further opportunities arising from the 1986 Building Societies Act, we intend to develop the range and scala of our operations even further.

These plans will require the full participation of an Assistant Treasurer who can develop our Treasury function. Our requirement is for experience of swaps, futures and options, probably in connection with the sterling capital markets and preferably with some knowledge of currencies.

Candidates should be educated to degree standard, but formal qualifications are less important than experience and potential. Age is also not of prime importance although the ability to work as part of a small team and to manage the function in the absence of the Treasurer will be essential.

In return for your expertise we can provide an attractive remuneration package with the excellent benefits you would axpect from a leading financial institution.

If you feel you have the qualities we are looking for, please contact our Treasurer, David Glozier, on 01-854 2400 axtension 5460 for an informal discussion or send your CV to Simon Morgan, Senior Personnel Officer (Head Office), Woolwich Equitable Building Society, 30 Erith Road, Bexleyheath, Kent, DA7 6BP.

## LEK PARTNERSHIP

# When markets go offshore

attention should focus pri-marily on moves to tighten up securities regulation in the US. Thera is, however, an impor-tant international dimension to the regulatory issues that are now being raised in the US Administration and in the Congress.

24

71-7 F. B

One specific concern relates to the use of off-shore financial centres for the purpose of con-cealing insider dealing activity: the wider questions are to do with the way in which Boesky and others had extended their arhitrage operations into other securities markets across the globe, not least in the case of Guinness's recent hid for Dis-tillers where share dealings are now being investigated by Department of Trade inspec-

Both points serve to under-line the importance of recent hilateral accords between the ta US and a number of othar countries including Britain, Switzerland and the Cayman Islands governing the confidential exchange of information on insider trading and other forms of misconduct in the securities markets. And they highlight the significance of the meeting being held in London this week between securities regulators from the world's main capital markets.

### Wider range

The meeting is not, in fact, a The meeting is not, in fact, a direct response to the latest bout of scandals on either side of the Atlantic. It was called hack in July, before the British Department of Trade and Industry bad signed its memo-randum of understanding on information exchanges with the Securities and Exchange Com-mission and the Commodity Futures Trading Commission. The invitations also went out well in advance to the public revelations about Mr Boesky and Mr Geoffrey Collier, late of Morgan Grenfell in London, who now faces charges of in-sider deeling in Britain.

Moreover, the agenda covers a far wider range of issues then insider trading. Officials will be discussing the scope for in-ternational co-operation in several of the areas covered by the recent US-British accord, including criteria for establishing the bonesty and competence of those who enjoy access to markets. Much of the emphasis will be on prevention, as well meeting is a useful staging post as cure.

IN THE aftermath of the All this is welcome, since it Levine and Boesky insider implies a recognition of the dealing scandals on Wall need for a genuinely inter-Street it is inevitable that national approach to regulation in a world where technology and a political commitment to liberalisation in capital markets have made a nonsense of national boundaries. The more national boundaries. The more so, since the London mesting brings together for the first time officials from Japan, West Germany and Switzerland, as well as Britain and the US.

Yet it would be unwise to place excessive expectations on the ontcome, because national attitudes and laws on securities conduct vary bugely. There are considerable diffarences in the institutional arrangements for securities regulation, arising from a different mix of statutory and self-regulation in individual countries. Above all, there are profoondly different national interests at stake in the extent to which international co-

operation is seen as beneficial Staging post

If, for example, the Boesky affair leads to much tougher regulation in the US than elsewhere, it is possible that other countries' securities markets will stand to benefit as business is driven off-shore. Certainly the enterprises. City of London has benefited in the past from the more restrictive reguletory climate that applies in US banking; It could benefit more in future if, for example, the present climate in the US leads to the preservation of the Glass-Steagel Act, with its clear distinction between com-

mercial and investment bank-The lack of such restraints on conglomeration in London constitutes a marked attraction for these US hanks that wish to service their clients' desire to issue tradeable paper. The Britisb and American de-cision to pursne bilateral

Another variant is the agreed certainly realistic. In the longer merger between a publiclyrun, however, a multilateral owned enterprise and a private partner. Recent examples inforum is undonbtedly needed; and this week's meeting could make a small step in the right direction by deciding whether the OECD, the International

Association of Securities Com-missions or some other body should do the job. In the mean-time the chief priority for the British should be to establish Neither deal grew out of any special belief in the intrinsic virtues of private ownership-Volkswagen is itself partly government-owned. The overa bilateral agreement with the Japanese, which would repreriding molive was industrial rationalisation, spurred by the sent a start in knitting together the three largest securities mar-kets in the world. The London need to achieve economies of scale at Seat and Alfa which only bigger and stronger partners could provde.

be-copyrighted like popular novels, Mrs Margaret Thatcher's Government would today he well on the way to echieving a runaway inter-national best-seller. national best-seller. Britain's pioneering experi-ment in privatising state-owned assets has become a worldwide trend, which is rapidly gathering, momentum under governments of both right and left-wing persuasion in countries ranging from the discover to the superseffuent. dirt-poor to the super-affluent. In Western Europe, privatisation programmes of one kind or another are planned or under way in about half-a-dozen countries. Enthusiasm has spread to countries and regions as disparate and far-flung as Jspan, India, Latin America, Canade, Africa and even to

F POLITICAL ideas could

China and the Soviet Union. No one reason explains the suddan popularity of privatisation. Budgatary constraints, dis anchantment with tha per-formance of nationalised industries, reactions to over-centralisation, stiffer international competition and emphasis on more entrepreemphasis on anote enterpre-neurial management bave all contributed to a growing awareness that the rules gov-erning state intervention in the

economy need to be re-written. The phenomenon has also been encouraged by favourable economic and financial conditions. Stable growth, bnoyant stock markets and robust cor-porate and institutional liquidity in most industrialised countries, as well as the inter-nationalisation of capital

### Lofty goals are often tempered by expediency

markets, bave msde it easier to find buyers for state-owned

But while the overall theme may be similar, treatment of the plot and the motives of the leading characters vary con-siderably from country to country.

To start with, the term itself has several meanings. For purists of the Thatcher school, it is unlikely to mean less than the transfer of a clear majority of shares and voting rights to privata investors. In other countries, notably Italy and Spain, privatisation is commonly used to describe the sale of minority stakes in enterprises which remain firmly under state controL accords, initially, is thus almost

divide between those European

countries driven by s belief that the state ownership system needs to be chopped back to its roots, and those which think it merely needs some judicious

pruning and retraining. Foremost in the first camp

choice of endings

versible shift in the structure

These lofty goals are also tempered by expediancy. As well as raising cash, privatisation is geared to reaping practical political dividends. In France as well as in Britain, wider share ownership is heing actively promoted partly in an attempt to tie the hands of-or still criticism from-left-wing critics of privatisation.

There are, nonetheless, differences between tha two countries. Due to the wave of nationalisations since 1981 the state sector in France is about state sector in France is about 30 per cent of gross domestic product—among the highest in Europe—compared with less than 12 per cent in Britain when the Thatcher Government was first elected in 1979. (It is below 2 per cent today)

below 8 per cent today.) France bas also committed itself at the outset to a much more systematic disposals schedule. It aims in the next five years to raise some FFr 200bn (£21.4bn) by selling off its boldings in 20 groups, comprising some 65 companies, at the rate of four a year. Shares

companies and last month successfully floated 38 per cent of GESA, an electrical utility on the stock market.

Raising cash is only one objective. Both IRI and INI also say stock market quotations enhance the commercial profile of their operations. In Italy, another important attrac-tion of private shareholdings is that they may deter self-interested meddling by national and local politicians, a perennial curse of most of its state industries.

However, IRI and INI still see a compelling industrial logic in a compening mustral logic in retaining firm control over all their main holdings, especially those in sectors regarded as of "strategic" national importance. For both groups, complete privatisation applies largely to businesses which are marginal to their main interests or which they can no longer afford to.

support. Professor Romano Prodi, wbo

so the aircraft never hits its target." This colourful simile perhaps this colournal simile percess gives the UK credit for a greater commitment to laissez-faire than it has shown in practice. The Government bas taken care to keep the power to block takeovers of several major nrivatised companies such as British Aerospace, Britoil and BT, hy means of snecial "golden" shares, and limits on maximum boldings. France also plans to use "golden"

Many in France also question the government's belief that pri-vatisation will end a tradition of dirgisme which has long flourished under administra-tions of all political colours. "It will require a real sacrifice shares in addition to restricting foreign investors to 20 per cent of initial equity Sues. West Germany's approach to

privatisation combines elements of both free market ideology and statism. About DM 1.6bn (£561m) has been raised since 1984 by selling federal govern-ment holdings-which involve interests in a total of some 400

companies and a dozen further candidates bave been lined up for sale after next year's elections.

# The Turks at the gates

though the bulk of its land and people are in Asia, Turkey has a claim to membership under the Treaty of Rome. Moreover, that claim was recognised explicitly at least in principle by the agreemant associating Turkey with the Community, concluded in 1964.

On the world political scene it would be nothing short of dis-astrous for the West if a rebuff to Ankara were seriously to weaken Turkey's links with the western alliance. Turkey is the south eastern anchorman of the North Atlantic Treaty Organisation and has a strategically flict, would bring increasing crucial role to play on the difficulties in a Council of borders of the Soviet Union. Ministers where both countries There is no real answer to that, bad a seat. As it is, Greece has unless one were to take seri-ously the occasional hint from Ankara that Turkey might con-sider a realignment of its foreign policy.

#### **Finely balanced**

On the Turkish domestic stage it can be argued, as was dona in the cases of Greece, Spain and Portugal, thet admitting the country to the Com-munity would strengthen the and of human rights in Turkey. It is an argument of much weight.

weight. On the economic side, the arguments are much more finely balanced. It is evident that, with the possible excaption of its textile plants, Turkish in-dustry lacks the strength to compete with its rivals in the Community Though We Ora compete with its rivals in the Community. Though Mr Ozal has dona much to ginger np Turkish enterprise by cutting subsidies and ancouraging com-petition, the situation is not yet fundamentally altered since 1978 whan Turkey ceased to cut tariffs against Community immorts as the association cut tarints against Community imports as the association agreement would have required. On the other hand a dynamic economy such as that of Turkey, with growth around the 6-7 per cent mark annually, could give the Community a much-needed filin fillip.

A judgment is required of Turkish membership

TURKEY nnder its reforming Prime Minister, Mr Turgut Ozal, intands to apply soon for full membership of the Enropean Community. Once received, that application will force the Twelve to confront some delicately poised decisions. As a European power, even though the bulk of its land and people are in Asia, Turkey has a claim to membership under the Treaty of Rome. Moreover, that claim was recognised Britain, Denmark and Ireland. As for the later entrants, Greece bas become the Com-munity's awkward member, and

on a very long road.

the enrolmant of Portugal and Spain at the beginning of this year will call for many adjustments. On top of that, the historic bostility between Greece and Turkey, which is regularly stoked up by the Cyprus con-

From Mr A. Spillard ALL IN TO IMPERA Sir, --- Can someone out there sir, — Can someone out there tell me which is the greater scandal — the insider dealings which have always been with us, or some of the takeovers

"We are throwing more and A hypothesis, as yet un-more of our resources, including proven, is that fully competithe cream of our youth, into tive goods and financial finoncial activities ... that markets may not be compatible. generate high private rewards Free trade in goods and services requires business confi-dence which in turn requires e reasonable degree of predictability in financial affairs. Global capital mobility and the deregulation of financial markets seems to have made this goal more clusive than ever.

> Financial innovation in the UK and the US has, at least temporarily, utterly nndermined monetary policy. The authorities no longer know bow to define money and certainly have little idea how to control a given aggregate, or even whether it needs controlling. It is possible in Britain that Interest rates have been at the "wrong" levels for several years, mainly because of the difficulty of interpreting extraordinarily repid credit growth. The cost to the industrial economy of excessively high and volatile real interest rates could easily swamp the puta-tive micro-economic afficiency gains from deregulating finan-cial markets.

The problem runs deeper, though. The touted remedy for monetary uncertainty is greater reliance on exchange rete targets and mechanisms such as the EMS. But, as Professor Charles Goodhart of the London School of Economics (and formerly Bank of England), has etressed, the voiced when expansive syndi-cated loans are superseded by chesper securitised credit? Why do the Bank for International Settlements (BIS and other watchdogs gnash their teeth and very factors that have under-mined monetary targets have also undermined exchanga rete management.

Global capital mobility and financial innovation bave contributed to the greatest in-stability of exchange rates ever experienced. Few major cur-rencies have ever been as adrift The answer, according to some Jeremiahs, is that finanfrom fundamentals as were steriling in 1980-81 and the dollar in 1983-85. The EMS bas been comparatively tran-quil because it contains only one main currency (tha D-mark), because it has been buttressed by capital controls (now being dismantled), and because member countries have been slow to join the financial innovation bandwagon. Rather than representing n brave new world of orderly, deregulated financial markets, the EMS is a benign throw-bsck to the pre-

of the powers of regulators were a conscious reaction to what was seen as the damaging laissez faire of the inter-war

policy operates, if at all, through the exchange rate: the tradeable goods sectors thus provide the "front-line troops" -bearing the brunt of appre-ciation as policy tightens, as tha US and UK have discovered to their cost in the 1980s. But

the protectionist forces thus unleased are magnified unleashed are magnified because exchange rates, driven by capital flows, are unstable and liable to veer away from competitive levels. Economists also argue that liberalisation may bave raised the risk of serious financial dis-

order. The creation of countless new instruments, trsded in vast volumes mainly off-balance sheet, has left the authorities lacking the information required to judge whether the macre system is stable. Individual institutions may Individual institutions may it is an "illusion" to believe have seemed to reduca their that even the most sophisticated have seemed to reduce their that even the most sophisticated risks by diversifying their busi-products, such as options, offer genuinely new ways of reducing purchasing stockbrokers—but, in the system as a whola, risk. The scale of the transfer of has merely been shuffled around. The greater integra-tion of markets and institutions to financial services of the work done by the scale

1971 era of controls. Winancial innovation thus ponent could have more far-timetens liberal trade in goods reaching consequences; espe-in two ways. With frea move-ments of capital, monetary while accustomed to extending investment," He argues that

emergency support to banks. are no longar certein what class of institutions should now, in effect, qualify for "lender-oflast resort " facilities.

At the same time, the explo-sion in the use of computers and other sophisticated hard-ware leaves many firms struggling to gauge the scale of the risks being taken, in their name, by quite junior ex-ployees. Few chief executives possess PhDs in pure mathemetics; bow then to control the backroom boys?

The real worth of many of the new products is anyway doubtful. As the BIS report notes: "Innovation bas cer-tainly not impreved capacity to predict the long-term future." Dr Ian Black, of the London Business School, points out that fold.

the sector abows all the hall-marks of monopolistic competi-tion—higb and rising advertis-ing expenditure and institutions clustered together, like gas stations around intersec tions. Firms are trying to differentiate almost identical products, and it is known that in such circumstances output can be much higher than is socially optimal,

And in the winter issue of the Oxford Review of Economic Pohcy, Dr Colin Mayer of St Anne's College, Oxford, raises another worry; the fact that unbridded competition in financial markets may easily lead to an excessive devotion of resources to information collection: "Discovering something that others do not know allows an individual to trade to his benefit at the expense of others. Thus the private benefits to being informed may be well above the social."

In other words, the research teams of Goldman Sachs and Salomon Brothers, from e social point of view, cancel each other ont. Tha one makes the other necessary, but only to different groups of private investors.

Scenticism about the need either for innovation or for a massive transfer of resources to the financial sector is in to the mancial sector is m-creased by a glance at West Germany. It may soon be per-suaded to introduce "reforms"; but it bas so far succeeded admirably with what, to Anglo-Saxon eyes, looks like a remark-bly originities dispecial system. ably primitive financial system.

It is, as the OECD pointed out in its latest economic survey, a country where only one in 1,000 businesses operate as public limited companies, where only a fifth of those that do have a stock exchange list-ing, and where a mere 30 shares are traded actively. The snares are traded actively. The number of plcs bas actually declined in the past 20 years, while the number of private companies has increased five-

Small, orderly and unadven-turous financial markets may be dull; but they lend stability to monetary policy and re-assure industrialists.

It is too easy to lose sight of the fact that financial services, like money itself, are not useful or desirabla in their own right. They are only a means to an end - the production of the real goods and services which people actually need.

Michael Prowse

**UK** long-term unemployment

# An investment that the nation has to afford

### By Richard Jackman

There would be a building THERE ARE now just under 1.35m people who have been out of work for more than a year. By way of contrast, the maximum recorded number of long-term unemployed people

in the Greet Depression was just under 500,000 (in 1933) while the minimum in the postwar period was as few as 20,000 (in 1956).

There are a number of popular, but fallacious, exlanations of the growth in long-term unemployment. Long-term unemployment is not due to the working attitudes of the young. Among men, teenagers have the lowest rates of long-term unemployment, while 45-60 year olds have the highest. The long-term unemployed are not all unskilled labourers left behind by the advance of tech-

nology. On the contrary, over half used to work in skilled manual or non-manual jobs. Nor is long-term unemployment simply a problem of the North-South divide. While unemployment rates are higher in the depressed regions, there are over 250,000 long-term unem-ployed people in the Sonth-East. Long-term unemployment is not the exclusive respon-sibility of Mrs Thatcher. Most sibility of Ars Thatcher, Most other European economies bave also suffered large increases in long-term unem-ployment, particularly since 1979. These facts are set out in en

Employment Institute pamphlet published today.\* The long-term unemployed, it says, are ordinary people who find themselves, as a result of their ex-perience of unemployment. unattractive to potential employers and unable to gct work. Most have held regu-lar jobs in the past. The reluctance of employers to hire them is, to that extent, irra-tional. Action is needed to overcome the inertia and get the long-term unemployed back the long-term unemployed back to work.

For action to be effective, it must involve a specific commitment: the guarantee of a job offer to every long-term un-employed person. This idea which was suggested earlier in the year by the House of Com-mons Employment Committee,† has been followed np in the pamphlet. The basis of the job guarantee

is to offer long-term un- if anything, tend to r employed people ordinary risk of inflationary lab jobs with ordinary employers. ages in the long run.

The second main worry is that providing jobs for the long-term unemployed will simply take jobs from others. But this disimprovement programme, designed to finance schemes programme, where private building contractors took on long-term unemployed people to repair and improve bousing and the infrastructure. There would placement hypothesis assumes there is a fixed number of jobs available in the economy. The allernative view is that the also be (smaller) achemea in number of workers available, the health and social services. and that new jobs will be There would be additional pro- created by the normal workings vision of training. And, out-side the specific schemes, any employer recruiting a long-term of the merket system. Despite its net cost, the job

guarantee is an economically unemployed person would receive a payment of £40 a week for a year. This general recruitment scheme would efficient investment for two reasons. First, the work experience the long-term unemployed acquire as a result of being initially be restricted to the back in work will build up over time and improve the overall very long-term unemployed (for more than three years) but as efficiency and productivity of long-term unemployment fell it would become ganerally avail-able. the lebour force. Second, many of the schemes, particulerly in the building improvement pregramme, will provide much-needed infrastructure invest-ment

Thus, the job guarantee is about real jobs. The need for the money is to overcome the reluctance of employers to hira ment. To see bow e job guarantee programme works in practice we have to look to Sweden, the long-term unemployed for such work, not to prop np arti-ficial or unproductive activity. where such a guarantee now forms part of a wide range of special employmant measures. The overall cost of these The gross cost of a job guaran-

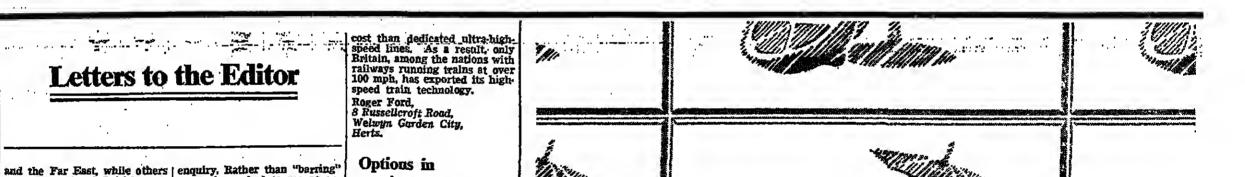

tee scheme sufficient to reduce long-term unemployment frem its present level of 1.35m to around 500,000 is estimated to build np to \$4.2bn in a full measures in Sweden is compar-able to our estimates (relative to GDP) for tha UK. As a result, In large part, of its extensive pregramme of special employ-ment measures Sweden has a very low unemployment rate (3 per cent) and one of the bestyear. But the net cost to the Exchequer would be very mncb less. On our estimates it could be as little as £1.3bn. The reason the net cost is so much trained and most productive labour forces in Europe. The smaller than the gross is largely because of the savings in sup-plementary and bousing benefits Swedish exparience shows that e job guarantee need be no

pald to the unemployed (which now average around £60 a week), as unemployment falls enemy of economic prosperity. In a competitive world, the success of a trading nation depends primarily on the skills as a result of the scheme, But bow can we be sure that

and enterprise of its working people. No nation can succeed if millions of its workforca are unemployment in aggregate will fall? Claerly, particular pro-jects will provide work for in millions of its workforca are not pulling their weight but instead are left idle and a burden on others. The long-term unemployed can be brought back to work. To do so requires a substantial invest-ment, but it is, nonetheless, vital. It is an investment that the nation can well afford. particular people but what of the effect on the overall un-employment rate? There are two worries bere. First, any-thing that increases the demand for labour may create, or intensify, sbortages in parts of tha labour market and bence sdd to inflationary pressures. Whatever the merits of this

argument in general, in current circumstances it does not apply to the long-term unemployed, Bringing tham back into the labour force will increase the availability of labour end thus, if anything, tend to reduce the risk of Inflationary labour sbort-

### The north has

#### its charms

From the Chairman, Worrington and Runcorn Development Corporation

Sir,-There is much debate nowadays in your columns and elaewbere, on the differing factors affecting the country's busi-ness, commercial and general economic performance either side of the so-called "north/ south" divide. In particular it bas become the fashion to suggest that dynamic, expanding and "higb tech" companies will inexorably tend to gravitate to the lush pastures of the south.

I would not ettempt to minlmise the problems faced by the older, traditional manufacturing areas of the country. I do feel, however, that the efforts and substantial succese of various regional agencies in attracting new national and internstional business to such areas merits far more positive awareness.

At Warrington-Runcorn we have newards of 80 companies in the electronics, aerospace and bio-chemical sectors alone. These range from multinational concerns to amall emergent companies engaged in state-of-theart activities. A substantial number come from USA, Canada

and the Far East, while others enquiry. Rather than "barring" are the result of British com-panies developing their own pointment as auditor from There's me, someone who inpointment as auditor from making a professional enquiry new technology to meet specific needs in the manufacturing or service industries.

of any outgoing auditor, our guidance places a positive obligation npon him to do so. There is no question of this practice being abandoned. The success of a high-tech company will depend on its product, the gnality and attitndes of management and work-force, its proximity to other E. J. D. **Options** in pensions

Roger Ford, 8 Russellcroft Road,

Herts.

Welwyn Garden City,

### From Mr I. Wolker

Sir - Mr H. Wynne-Griffith riticises the politiciana and/or civil servants for not under-standing tha implications of some of their decisions (Financial Times, 5th December). I would suggest that bis specific worries about bouses replacing pensions are replacing unfounded. are

Repayment of the mortgaga at retirement does not affect the member's pension, it only

affects his tax-free cash sum, and with personal pensions the formula used to calculete the lump sum requires there to be a rasidual pension. A con-tracted-ont personal pension will also be required to provide "protected rights" in respect of the DHSS minimum

Thare is certainly confusion

in pensions if not indeed chaos, as alleged by Mr Wynne-Griffith, but rather than edd-ing to it, I believe the "new rules" may go some way to rutionalising mottor

In particular, the rules are In particular, the rules are a step in the right direction as regards Inland Revanne limits. They go some way to removing the anomaly of higher limits for employees in schemes not contracted-out, as opposed to those that are (albeit through e personal pen-sion). Also, and more impor-tantly, for the first time an employee may look to three separate sources of pension and protection at one time. It is protection at one time. It is now possible to be in: a com-pany schema ("risk benefits"

only); the state scheme (basic pension only); and a personal pension scheme. Iain B. Walker,

40 Ennismore Gardens, SW7.

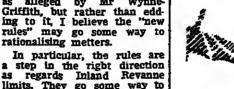

A question of title

FINANCIAL TIMES

Wednesday December 10 1986

David Marsh reports on a swing towards the W. German conservative parties

Strauss aims for absolute victory

THE POSSIBILITY that West Ger-many's conservative parties could win an absolute majority in the January 25 general elections is setting nerves on edge across the country's political community.

Such an outcome would mark a sharp deviation from West German voters' post-war habit of voting for coalitions to guard against excesses from either left or right. But the crushing defeat of the opposition Social Democratic Party (SPD) in state elections in Hamburg a month ago has made the possibility of a majority government a factor in the pre-election jousting.

The swing towards Chancellor Helmut Kohl's Christian Democrat-ic Union (CDU), has coincided with new tension between these two parties and the junior partner in the Bonn coalition, the liberal Free Democratic Party (FDP).

After months of apparent hesitation about his political ambitions, Mr Franz Josef Strauss, the Prime Minister of Bavaria and leader of the CSU, has made it clear he is playing for the highest stakes. Sensing that the conservative

wind is in his favour, be has con-cluded that it could be strong enough to allow the CDU/CSU to rule alone in Bonn after the election - blowing the FDP out of the coali-

For Mr Kohl, an absolute majority for the CDU/CSU in January would almost certainly be a Pyrrhic victory by leading to the return to Bonn of a triumphant rival in the form of Mr Strauss.

The Chancellor also realises that talk about a possible absolute majority acts as a powerful vote-winning spur for the currently deoccord SPD,

Mr Johannes Rau, the Prime Minister of North Rhine Westphalia and the party's candidate for the chancellorship, is clinging to the goal of seeing the SPD become the

But only once - in 1957 - well not even have happened yet."

have they won an absolute majority

of votes. Reflecting the peculiar checks and balances built into post-war West German politics, any move by one party towards dominance auto-matically tends to set off a counterreaction back towards the centre by

voters wary of extremist shifts. Mr Genscher in particular and the FDP in general may well therefore have been boosted rather than weakened by stracks mounted on the present Foreign Minister's poli-cies by Mr Stranss and his friends

during the last few weeks. A senior SPD deputy and former minister who stands on the right of his party says the latest escalation of the Strauss campaign to disloge Mr Genscher should help the FDP on January 25 to score comfortably more than the 5 per cent of votes needed to win representation in the Bundestag and a seat at the CDU/ CSU coalition table.

Both the CDU and CSU have hit out at the FDP for deserting an agreement reached in October to

bring in new legislation ellowing terrorists who turn state's evidence to escape prosecution\_ But again - barring the possibility that West Germany's urban guerrillas will mount another bloody at-tack during the election campaign the stand of the FDP against overhasty, anti-terrorist measures may end up winning, rather than losing

the party votes in January. Although there is little doubt that Mr Kohl will again be Chancellor in February, his apparently impregn-able lead in the polls and the evi-dent disarray of the SPD may well mean the election result will be

closer than it would now appear. As one Western diplomat in Bonn says, reflecting the violent hurches of public opinion in reaction to out side events and influences: "The is-

Zambian riots after food price increases

By Victor Mallet in Lusake

PRESIDENT Kenneth Kaunda of Zamhia yesterday declared a dusk to-dawn curfew in copper mining towns after at least eight people were reported to have died in riots over rises in the price of food.

The Government also closed the country's land frombers to outgoing travellers, but international air traf fic continued normally. The moves followed a day of in-

creasing violence in which ricters rent on the rampage, looting shops

and storing cars and buses. Police used batons and tear gas in Kitwe and Ndola in an effort to ontain the protest. The official Zambia News Agency said that police had fired on stone-throwing crowds, in clashes of marked in ensity and ferocity."

The situation is very had," a pothis issue in Europe during Janualice spokesman said. Crowds of youths hurled stones and bottles at European subsidisation of its airpassing vehicles and smashed and looted shops, offices and factories, craft industry is a point of concern for the US not only because the intaking away televisions and other goods. Police sealed off the town Yeutter plays a waiting game, Page 6 and told residents not to go to work. Later the violence spread to Ndola and, apparently, to other copper belt towns as well. "The police are all over Ndola. There is tear gas smoke all over the town centre," said one Ndola office worker. "We hear the guns going on," said a Kitwe resident.

Yesterday, before the news of the troubles on the copperbeit became known, Dr Kaunda told a political seminar for the armed forces that Zambians should not despair but should work hard to revive the

country's ailing economy. Dr Kaunda, however, after a rejection of rigid socialist policies supporters who fear that outspoken which amounts to a volte-face, has defended the austerity programme as the best long-term solution to Zambia's problems. gan of "never again" as the main

But he has faced growing discon-tent from trade unions and leaders of his own ruling United National Independence Party (Unip), the ony legal political party.

BUSINESS £20m Royal Navy sonar contract

> Ferranti has won the £20m contract to build the second batch of Type 2050 sonars for the Royal Navy. All 10 of the new sonar sets will be fitted in the RN's latest Anti-Submarine Warfare frigates, the Type 23s, enabling them to counter th Soviet submarine capability in the 1990s. Ferranti Computer Systems Cheadle Heath Division, in went to sea some six months ahead of schedule to undergo sea trials in HMS Jupiter. The trials confirmed confidence in the overall validity of the

erranti on November 28 showed turnover up 7% at £297.8m and profit before tax advanced 16% to £21.9m. advanced 16% to £21.9m. Earnings per share improved 13% to 3.4p. Group order book of £770m is a record and first half new orders are up 30%. Notable success was achieved in new markets against world-wide competition. Excluding semiconductor activities the group achieved a 19% improvement in operating

conductor market is not expected to improve before mid-1987. However, the new-range of integrated circuits is being well received and will make a significant roo-tribution to be water state. conductor market is tribution to next year's sales. The largely vacant Oldham site formerly housing heavy engineering has been sold Borrowings at 30 September are substantially unchanged: six month capital expenditure was £14m. Interim dividend is 0.6p, up 9%.

# Goodyear to use part of \$4bn facility to buy back shares

### BY WILL'IAM HALL IN NEW YORK

GOODYEAR Tire & Rubber, which back. However, Goodyear has decided to use its own bankers. The credit facility is believed to last month thwarted an unwelcome \$5.3 bn takeover bid, has arranged e \$4bn credit facility with a group of 17 banks which is considerably more than it needs to finance its controversial share buyback plan. Mr James Glass, Goodyear's

chief financial officer, says the proceeds will be used to repurchase 40m shares of Goodyear's common stock, to refinance amounts outstanding under certain existing bank credit arrangements and for general corporate purposes. As part of its strategy to defeat

an unwelcome bid by Sir James Goldsmith, the Anglo-French financier, Goodyear agreed to buy back Sir James' 12.5m shares at \$49.50 a share and another 40m shares at \$ 50 a share from the remainder of Goodyear's shareholders. Goodyear's shares were unchanged at \$42% in early trading yesterday.

Sir James Goldsmith had paid \$22m to raise the necessary bank financing for his bid for Goodyear and had offered to use his best endeavours to persuade his bankers

Ferruzzi boosts holding in Montedison

#### By Alan Friedman in Milan

MR RAUL GARDINTS Ferruzzi agro-business group has acquired a key 1.6 per cent equity holding in the Montedison chemicals concern, ing the Finnish banking market. increasing Ferruzzi's total Monte-dison shareholding to 26.6 per cent. Norwegian subsidiary, which began operations only last year, is also un-Under Italian convention, this stake der review, although Mr Richard Lowry, the bank's regional execugives Ferruzzi effective control.

The 1.6 per cent shareholding in Montedison, which is worth L92bn (\$66m) on the basis of yesterday's share price, has been acquired from Italcementi, the cement company controlled by Mr Giampiero Pesen-

Instead of receiving cash, Mr Pesenti has been given a 25 per cent shareholding in Ferruzzi's quoted Calcestruzzi cement holdings subsidiary.

The latest acquisition of Monte-dison shares is part of Ferruzzi's drive to consolidate its already effective control of the Milan-based chemicals group. Mr Gardini is thought to be close to acquiring still more Montedison share holdings. Meanwhile, it was also learned

yesterday that Mr Gardini has broken an agreement with Mr Enrico Cuccia of Mediobanca, the mer-chant bank, which would have led to the two men jointly deciding on board appointments at Fondiaria, the Florence-based insurance business, now 41 per cent-controlled by Montedison.

### Lockheed acts to deter takeovers

LOCKHEED, the US aerospace group, has adopted e shareholders' rights plan designed to deter coer-cive takeover tactics and to prevent anyone from gaining control of the company without offering a fair price to all Lockheed shareholders. The rights were not being distributed in response to any effort to acquire control of the company, Lockheed said.

# **Bank offer complete**

### BY RODERICKI ORAM IN NEW YORK

CONTINENTAL Illinois said the Federal Deposit Insurance Corpora-tion had completed its offering of common shares in the Chicago bank holding company.

The issue was fully subscribed at \$5.25 a share, contrary to the previously reported concern of market participants that the underwriters had failed to find buyers for all 50m shares initially offered. In fact, the underwriters took an additional 2.5m shares to cover over allottments that resulted from investor interest.

Mr Eric Dobkin, a partner in Goldman, Sachs, the lead underwri-ter, said all the shares were sold at the time of pricing with the end buyers representing a broad group of institutional and retail investors. With some analysts calculating that a \$5.25 a share price indicated a price-earnings ratio of about 17. some investors were cool to the is sue. Goldman Sachs said, however, that a ratio of 10 was more realistic. Mr William Seidman, chairman of the FDIC, said the issue price was "within our expectations."

This announcement appears as a matter of record only.

### Swedish institutions take stake in SSAB

By Sara Webb in Stock A CONSORTIUM of Swedish pension and insurance funds, led by Skandia, the insurance group, is to buy one-third of the shares in SSAB, the Swedish state-controlled com-mercial steel group, for around SKr 450m (\$65m). Last month, the Government agreed to buy Electrolur's 25 per cent stake in SSAB for SKr 600m and announced plans to increase the owner-ship in SSAB with a view to eventually bringing the group to the stock market. At the same time, the board A CONSORTIUM of Swedish At the same time, the board at SSAB was given a new look with geveral strong industrial names, a move which was seen as an inducement by

consortium members. Skandia and the Fourth National Pension Fund will each have 8.33 per cent of the shares in SSAB, while the two shares in SSAB, while the two Skandinaviska Enskilda Ban-ken pension funds will own 5 per cent and 3.33 per cent. SPP, the while collar workers' printing mension fund with own 5.83 per cent, and AMFp, the bloc collar workers' pen-sion fund, will own 2.5 per sion cent.

Under Swedish law, insur-ance companies cannot con-trol more than 5 per cent of trol more than 5 per cent of the votes in a company, and the one-third stake will repre-sent 20 per cent of the con-trolling votes in SSAB through a mixture of A shares and weaker B shares.

Mr Olle Ryd, state secretary Mr Olle Ryd, state secretary in the Industry Department with special rezponsibility for state-owned concerns, said that SAB would be introdoced on the stock market "as soon as possible" provided the company met with stock ex-change requirements.

However, members of the source and the second s least four years. The Govern-ment has so far embarked on a very modest privatisation programme, placing 15 per cent of PKbanken on the stock market in 1984. • Alfa-Laval, the Swedish process engineering group, is negativing to hur the Euronegotiating to buy the Euro-heat unit of Saab-Scania, the near unit of Saabscanz, the motor company. Euroheat is a producer of district heating plants and hot-water heating tanks. It has annual turnover of SKr 240m and 300 amployees.

# **Deere suffers fall into loss**

DEERE, the world's largest mann-factorer of farm equipment, lost \$139.3m or \$2.06 a share in the fourth quarter to October. The re-sult was affected by o weak North American farm economy and a crip-pling three-month strike at all the Company's main factories in the US. The 150 year old company also re-ported its first annual net loss since

### Woolworths stake goes to Rainbow

By Our Financial Staff

RAINBOW, the acquisitive New Zealand retailing, amose-

New Zealand retailing, annusc-ments and property group, is paying A\$190m (US\$124m) for the 20 per cent stake in Woolworths, the Australian retailer, put on to the market several menths ago by Safe-way Stores of the US. The deal, which is subject to tho approval of the Aus-tralian Fereign Investment Review Board, would leave Rainbow holding a stake in Woolworths of equal size to that owned by Mr Ron Brierley's Industrial Equity Limited. Rainbow is paying A\$2.83 aplece for the 44.5m Woolworths shares changing hands and A\$19m for other assets involved, according to assets involved, according to Macquarie Bank, its financial

adviser. Safeway originally offered Its stake in Woolworths (which has no connection to either the US or UK groups emper the US of the groups bearing a similar name) as a result of the management buyont last summer which left the blg US supermarket group with a heavy debt burden on its balance sheet. It is understood to have been anxious to complete the dis-posal before the end of this year in view of recent changes in US tax legislation.

FOR A \$1200n market that depends on a single firm—and a single man—for much of its liquidity and supply, junk bonds are doing pretty well. They are doing especially well now that both Drexel Burn-ham Lambert and Mr Michael Milken, the 40-year-old Drexel executive who all but invented the modern junk bond, have the modern junk bond, have received subpoenss from the Securities and Exchange Com-mission to give evidence to the investigetion into the Boesky affair, Wall Street's largest insider trading scandal. Investors.

In an opaque market, where there is no central exchange and dealers have an interest in maintaining confidence, it is not easy to establish what bas happened since November 14, the day Mr Ivan Boesky, 2 well-known Wall Street investor and Drexel client, announced he had agreed to pay \$100m in casb and assets end co-operate in an insider trading investigation by in junk bonds. the Securities and Exchange Commission.

Dealers say that the market immediately lost from 2 to 4 points, but bad made balf of that np again by the end of last week. Mr Fred Joseph, chief executive of Drexel, told a meeting of securities analysts last week that trading volume was down "50 per cent on the first down ' day. However, it is back to normal volume now."

He added that there bad been some \$2.5bn in new issues since November 14, including the \$1bn debenture from Safeway, the supermarket group, which Drexel started marketing that very day.

Ten years ago, the market consisted largely of debt securi-ties of once-proud companies that were down on their luck: Dealers and analysts give a host of reasons for the market's resilience. A number of large so-called fallen agels. That was junk financings were scrapped, such as a \$4bn bid for Gillette JUNK BOND ISSUES from Mr Ronald Perelman, while others were delayed. "All the Manh

Value Sho 1.38 1.28 2.50 7.53 14,11 14,75 supply was on the counter," says Mr Robert Wallace, of Fort Hills 1981 56 133 185 The specialist mntual funds, which stayed out of the mar-1984 1985 210 29.13 ket in the face of uncertainty and some institutional redemp-To Dece ce: IDD Infon n Services tions, are now buying again. Above all, "Drexel and the others were willing to make markets in depth," saya Mr Mike before Mr Milken, who is credited with discovering thet a default rate as low as 1 per cant

was more than discounted by high yields, started issuing junk apecialist mutual funds invested bonds for companies that could not otherwise have access to term finance. Since 1984, Mr Milken has

Junk bonds, or high-yield securities as Mr Joseph and Mr Milken prefer to call them, are corporate debt instruments that transformed the market-and in the process bas turned himself into possibly the best-paid in-vestment banker in the US-by the credit rating agencies assess as "below investment grade" because the issuing companies selling bigh-yielding bonds as a might not meet interest or prin-cipal payments. The bonds now yield an average of 350 to 450 basis points more than Treasury means for corporate raiders, and shell companies without earnings and assets, to leverage up on the assets and cash flow of target companies. From an bonds of similar maturities, but

the range is dizzying: LTV, the steel company which sought Chapter 11 protection from its about 35 per cent. Ten years ago, the market He has found a ready bome

He has found a ready bome for the bonds among insurance companies and thrift institu-

companies and thrift institu-tions desperate to maintain re-turns against falling interest retes, pension plans, the mutual funds and even the public dir-ectly. They bave not been a particularly good investment: over five years, they bave under-performed Government bonds-and even the specialist mutual funds monitored by Lioper have Swingle of 1. Now First, the Baltimore mutual fund group. These would include such names as Morgan Stanley and First Boston. While Drexel funds monitored by Lipper have legged Government funds this

names as Morgan Stanley and First Boston. While Drezel may dominate the primary mar-ket, it probably eccounts for "considerably less than 50 per cent of the secondary market," says Mr Swingle. "Even if the worst happens to Mr Milken, then other capital would be committed to the market," says Ms Bolmeir of Merrill Lynch. The present crisis has Bothing "Bnt people looked at their CDs and saw that they used to pay 9 and now pay 6, and they go for the yield," says Mr Jim Grant, who runs. Grant's Interest Rate Observer and is • The present crisis has nothing an outspoken bear on junk bonds. to do with the investment merits or demerits of the bonds them-

or demerits of the bonds them-selves. "It's not the bonds under a cloud but the bankers," says Mr Grant. "But their day will come. At the moment, etten-tion is being distracted to Bev-eriy Hills from where it be-longs, which is the balance-sheets and income statements of the companies." Mr Milken is still accorded a key role. There was a new bout of jitters in the market last Friof jitters in the market last Fri-day when there were rumours that he might be further em-broiled in the SEC's investiga-tions. "Typical issues fell e point to 14 points on Friday." says Ms Nancy Bolmeir, a sec-ondary market trader at Merrill Lynch. The rumours have since cubrided the companies." Mr Lipper agrees: "If there is a problem with this paper, it will come with the next recessubsided.

But dealers and analysts are

# **Convertible Eurobond for** Dixons well received

### BY HAIG SIMONIAN

DIXONS, the fast growing British consumer electrical re-tailer, yesterday launched a convertible Eurobond, led by S G Warburg Securities, which was quickly increased from from to f68m. Final terms were

• There are few major invest-ment banks not involved in try-ing to generate handsome com-mitment and brokerage fees from junk financings. "If Drexel slows down, the others will jump in." says Mr Dick Swingle of T. Rowe Price, the swiftly brought forward. Issued in the name of Dirons Group (Capital) and guaran-teed by the parent company, the par priced 2002 deal has a 6/ per cent coupon. The exercise price is 367p, representing a 11.89per cent premium over yesterday's closing share price in London of 328p.

Dixons will be using the proceeds to finance expansion and to bolster its capital base. The company is now capitalised at about £1.4bn in the market against shareholders' funds of just £172m.

just £172m. Though Dixons' shares, stand-ing at \$30p, are some way be-low their 448p high at the turn of this year, the lead manager reported very strong demand, with paper being sold heavily into continental Europe. Unde-tarrad by the churds over star. terred by the clouds over ster-ling, investors appear to have seen the deal as an appealing way into Dirons' shares at an

way into Dixons' shares af an attractive yield. Yesterday's all-out fire drill in the London Stock Exchange building did not deter one tenant, UBS Securities, from launching a \$150m 1904 equity warrant issue for Jacobs Sachard International Finance (Cayman), a financing arm of the Swiss food group. those in yesterday's deal. Regie des Telephones Telegraphes (RTT), the Belgian public telecommunications authority, issued a \$100m 71 per cent 1992 bond, priced at 1007, and led by Chase Invastment Bank.

### ND SERVICE

When it comes to international banking there is nothing like a little flag waving. Our symbol above is fast becoming synonymous with a new dynamic in worldwide trade finance.

In fact, since our establishment in London in 1969, we have grown to become Britain's eleventh largest bank. And much of this growth has been on the strength of our innovative approach to UK and international finance and investment.

Beside the resources of our head office in London, we are able to offer powerful on-the-spot support in key international financial centres.

We have already achieved many firsts in our pursuit of new ideas. For example, we were the first British bank to be awarded an A1 Standard & Poor's rating in the U.S. We were amongst the first banks to develop new export finance methods like forfaiting to help British exporters. But all these firsts come down to people. People with bright ideas, whether they be our staff or our clients, deserve the utmost encouragement.

If you're looking for an innovative approach to trade finance, export funding, foreign exchange, investment management or any other aspect of UK or international business, call us.

You'll find that our deepest commitment is to putting out the flags for you.

# The art of British banking Scandinavian style.

The final dividend is raised Growth in overseas earnings to 5.489 (4.57p) making a total from TV rental and retail, at production, with a turnover of 68.52p (7.1n). Turnover increased by 10 per assisted by the elimination of £197.5m (£176.4m) contributed cent from £767m to £841m, a losses of about £2m in the US Net advertising revenue at

£128m was up by 20 per cent. The leisure and consumer services division, which includes Granada theatres, bingo cinbs, and motorway services, had a turnover of £160.3m (£148.3m), turnover of £160.Sm (£148.3m), contributing a 36 per cent in-crease in profits at £19.4m (£13.5m). During the year the division opened five bingo social clubs and opened its first two Granada Lodge hotels at Stirling and Exeter service areas. A new acquisition was Park Hall, a multi-activity leisure site.

Services to business, the last leg of Granada's four major development areas, showed 16 per cent growth in profits to £1.7m, the most significant development being the move into third party computer maintenance.

Total net borrowings were £99.im (£67.4m) with a gearing of 27 per cent, only slightly up on that of 1985 because of a re-evaluation of trading properties. See Lex

### **Battle for APV** cost Siebe

£10.5m By Clay Harris

Siebe said yesterday that its unsuccessful bid for APV Holdings had cost £10.5m, more than half of its interim pre-tax profits of £20m. The safety products and

The safety products and engineering group's 82 per cent profits advance in the six months to September was achieved on sales 74 per cent shead at £236.4m (£135.9m). The Siebe and Tecalemit com-panies, which had been part of the group for all of the comparable period, increased sales by 5 per cent and profits by 15 per cent. Siebe took an extraordinary charge reflecting a loss of £5.7m on the sale of its 27.5 per cent stake in APV and costs of £4.8m related to the

costs of \$4.8m related to the takeover battle.

"We will think hard before we make a hostile UK hid," Mr Barrie Stephens, chief executive, said yestenday. He defended the decision to sell the stake in the engin-cerime commony at a lace in

eering company at a loss in September, more than two months after the 5220m bid failed. "If we'd held on to it for another week, we'd have lost (another) 20p a share." The disposal also freed nearly £50m to apply towards the subsequent \$466m

the subsequent \$466m (£317m) acquisition of Robertshaw Controls, the US Robertsmaw Controls, the US controls system group which will lift North America's contribution to 52 per cent of turnover and 40 per cent of operating profit. It will be in-cluded in the accounts for the small drag manths, of the

of the comparable period. This helped the engineering This helped the engineering division to lift profits to £12m (£4.2m) on turnover of £168.8m (£74.3m). Dentsche Tecalemit, acquired in November last year, contri-buted £371.000 in pre-tax profits.

yesterday published third quarter figures which showed a loss after tax of £4.2m, com-pared to a profit of £4.1m in the CIL. Canadian chemicals group 73 per cent owned by Imperial Chemical Industries, has halved its quarterly dividand in the same period of 1985.

wake of intense competition in several of its business sectors The latest figures have been prepared excluding the com-pany's US assets, which were sold last month for £60m, and and a sharp fall in profits. The Toronto-based company said that the common dividend payable next Jannary would be cut from 20 to 10 cents a share.

Preferred dividends were not affected. The company'a earnings fell to C\$16m (£8.2m) in the first nine months of this year from C\$34.5m in January-September 1985, on almost unchanged sales. Income in the third quarter was nil, Mr C. H. Hantho, chairman, said yesterday that fourth

quarter profits were also likely to be well below last year. We blamed the deterioration mainly on a severe squeeze on prices and margins in the company's agricultural division, which manufactures fertiliser

products. Ammonia prices have sunk so low that they harely cover variable production costs. Conditions were also difficult in the explosives and specialised chemical businesses, which supply the hard-pressed North

industries.

Tricentrol, the ailing UK field, third quarter production last year of £18.2m was this independent cili company, was 19 per cent below the same time translated into a loss of yesterday published third period last year. £5m. In the first nine months, the company generated £8m cash after tax, compared to an after-tax cash flow in 1985 of £32m.

However, the amount of expenditure was also cut drastically. Without outgoings on exploration and develop-ment of £9.4m, expenditure emerged more than 65 per cent turnover on that basis tumblad from £23.4m in the third quarter of last year to £4.9m. lower than the 1985 figure of £27.2m. The company said that In the UK, Tricentrol was hit

the forecast 30 per cent cut in overheads had been achieved. not just by the fall in the oil price-which in the first nine price—which in the first nine months averaged £9.71 a barrel compared to £20.65 in the same period last year—but by a £58.9m relating to the sale of decline in oil production, which so far this year is down by 10 per cent. As a result of main-tenance work in the Thistie £33.7m, while a profit after tax The third quarter figures con-

• Tricentrol's shareholders are interested in one thing only:

whether or not the company will be takan over. Thus the market's disapproval of these results, which reveal little either to attract or repulse a possible bidder, is bard to understand. Perhaps the glimpse of the company stripped of its US assets served as a reminder both of its historic want of exploration successes—which have given it a cost base so high that profits at present oil prices are unthinkable—and of the impos-sibility of financing costly development projects on its more recent exploration suc-cesses. While the sale of the US assets has bought Tricentrol some time, it has not bought it very much. Gearing is still about 130 per cent, and although the sale will have turned a cash drain of abont £30m this year into a small surplus, the huge capital projects

in the bag will force further asset sales before long. That is unless Tricentrol is put out of its misery altogether by some-ona altogether bigger and stronger. For such a prospect the shares wait at 59p, down 2p

6 months to

"The figures for the year ended 31st March 1986 are extracted from the Group's Accounts at that date which have been delivered to the Registrar of Companies. The Auditors' Report on those Accounts was unqualified.

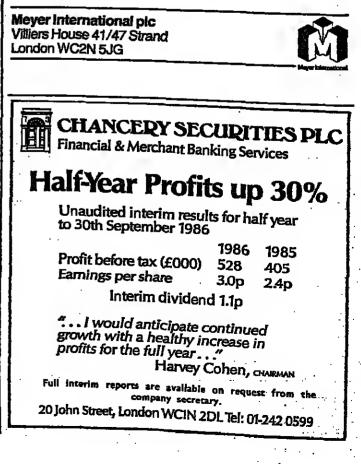

### The Chairman, Mr Ronald Groves CBE, comments:

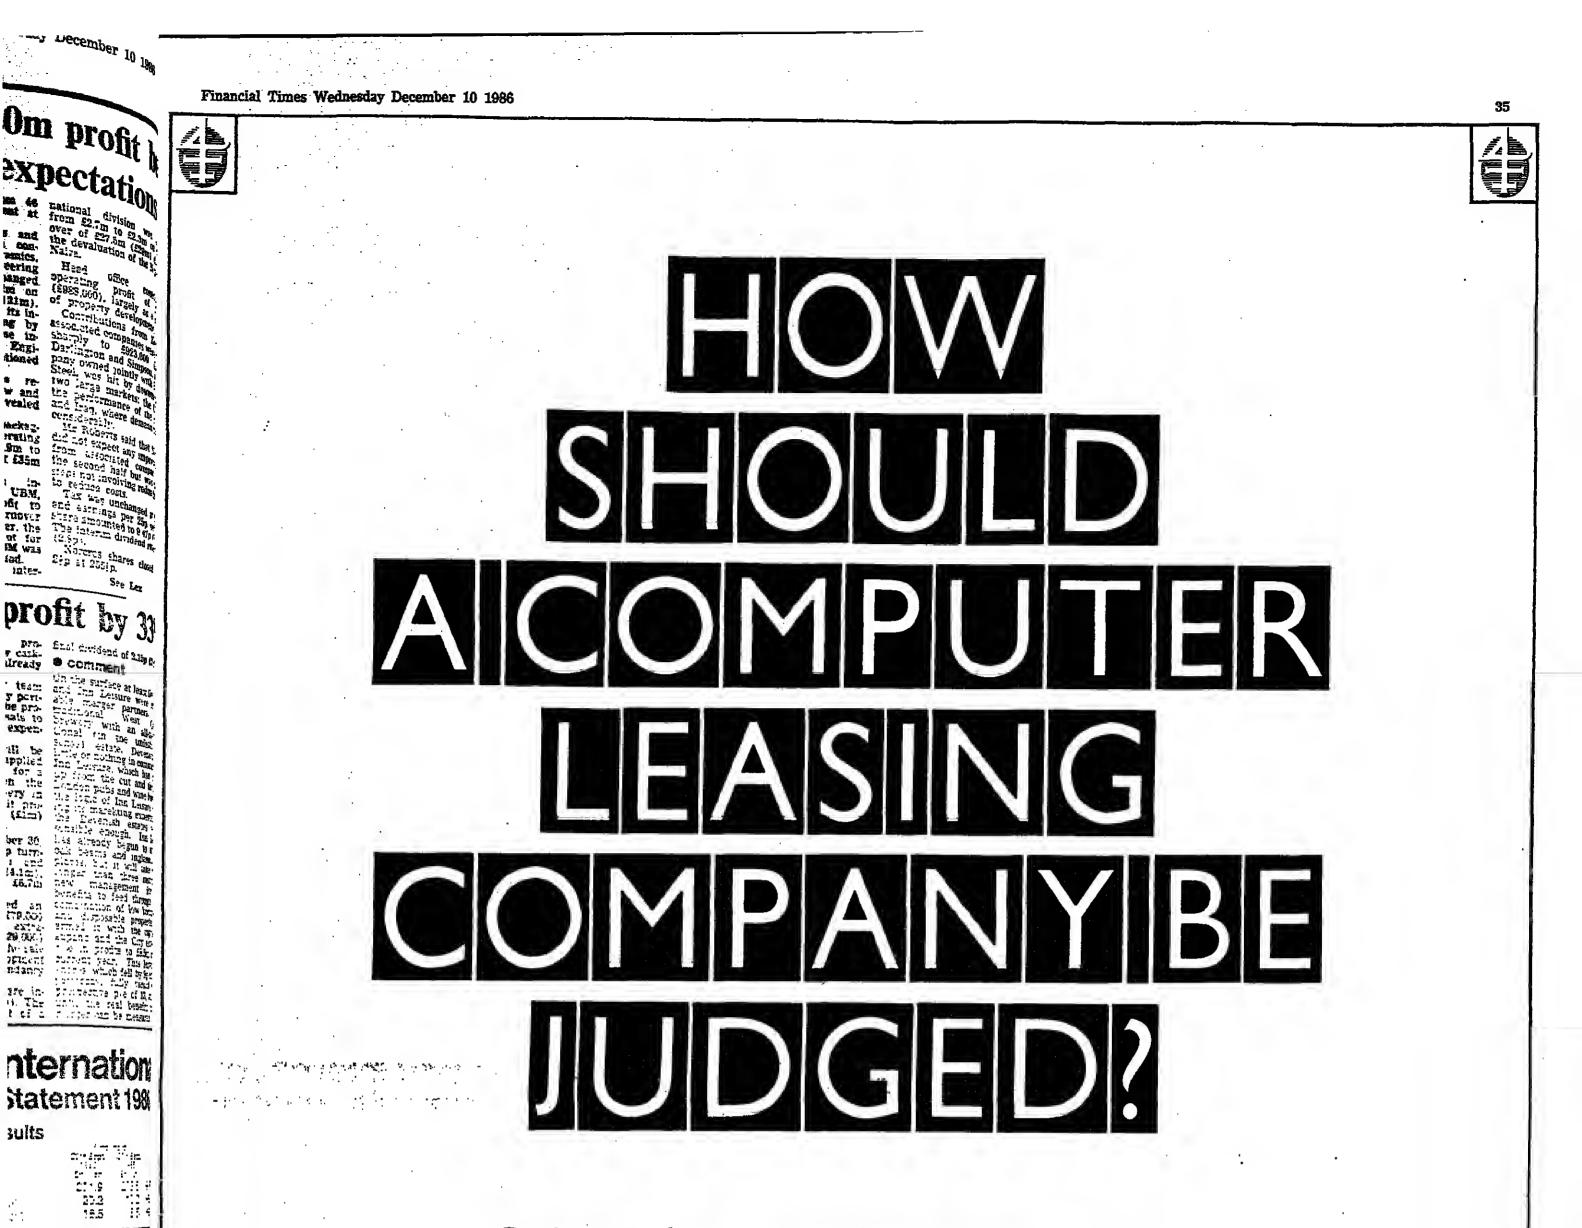

In line with expectations, as the year has progressed there has been an improvement in the level of activity in the construction industry. This, together with firming prices for timber, has made for better trading conditions. Accordingly, margins have improved to give a satisfactory start to the year. Trading continues well and - subject to the usual qualifications about the Winter - we look to a good second half and are on course for a record year.

The acquisition of Brownlee PLC was completed last month, from which the Board is confident that a worthwhile contribution will arise.

The interim dividend per share has been increased to 2.15p (1.95p) and will be paid on 9th February 1987 to those Members on the Register on 9th January 1987. Copies of the Interim Statement are available from

The Secretary.

### Standard Chartered takes 13% stake in Abaco

#### BY CHARLES BATCHELOR

in Abaco. The capital will be used initially to help finance the acquisition, announced yesterday, of Hampton & Sons, an estate agency based in St James's, London, for np to f15m. It will also wipe ont borrowings used to fund two other recent acquisitions.

It gives Abase a second large corporate shareholder alongside British & Commonwealth Shipping, which has been a long term investor. B & C's shareholding will fall from 27.4 to 23.36 per cent as a result of the Standard dool Noth have of the Standard deal. Both have said they would not make a hostile bid for control for at

least three years. Mr John Gunn, B and C chief executive, said that if B and C bad provided the additional funding it would bave taken its stake above the 29.9 per cent further acquisitions. Loan further acquisitions. Loan facilities ere at present provided by Den norske Creditbank. Abaco had been planning a share placing when Goldman

Standard Chartered, the level at which a mandatory anking group, is to provide takeover bid would have had to Standard Chartered, tha level at which a mandatory banking group, is to provide takeover bid would have had to £18.5m of funds to Abaco be made. B and C did not want Investments, the fast growing this and welcomed Standard as financial services company, in a secon majo rshareholder, he a move which will give added. Standard a 12.7 per cent stake Mr. Michael McWilliam, Standard a 12.7 per cent stake Standard's menaging dimension

Mr. Michael McWilliam Standard's managing director, will join the Abaco board. He described the Abaco share pur-chase as an extension of its existing involvement in finan-cial eervices through its Chartered Trust subsidiary. "It

is a toe in the water," he said. Chartered Trust is a bira purchase and finance company which has been developing loan programmes for building societies and insurance pro-ducts. Its network of 70 offices and its customer hase overlap with those of Abaco, Mr McWilliam said.

Standard will also contribute to a £40m loan facility which Abaco will draw on to finance

introduced Standard which was prepared to take np all the new shares. Mr Peter Goldie, chief executive of Abaco, said. standard will take up 25.4m new

shares at 74p each. The size of the Standard shareholding has been deter-mined by the takeover panel limit on initial acquisitions of company's shares of 15 per cent. This becomes 12.7 per cent of

Absco's enlarged capital. Hampton is the third estate agency to be acquired this year by Absco and brings it 18 more offices handling residential pro-perty sales, bringing the total to 57. Hampton made a profit, before non-recurring items and tax, of £777,000 on turnover of £6.8m in the year ended Sep-tember 1986. It gives Abaco its first central London chain of

agencies. Abaco is paying £10.5m on completion, comprising £7.85m cash and £2.65m in shares. It will pay an additional £4.5m in completion of mathematical for the start of shares if profits of Hampton rise to £1.32m in the year cod-

ing September 1987. Abaco's shares rose 2p to 69p.

### All-round lift gives Vaux £17m

ALL TRADING divisions of the related Vang Group improved their per-formance in the year ended come £423,000 (£656,000). September 27 1986, resulting in Finance charges were cut from turnover moving ahead from £1347m to £1.86m. El44.7m to £163.5m and the pre-tar profit from £14.72m to (28.3p) and the final dividend \$17.52m

tar profit from £14.72m to £17.52m. And the directors said they had ambitious plans for growth in all divisions over the next few years. The balance sheet was relatively ungeared and they believed there were good opportunities for expansion in many areas, including nursing homes.

bomes In pursuance of the latter, they were planning to convert the St. Andrews Hotel into a nursing home, and operate it for older people. If that was successful they said they intended to extend the group's interests "in what we believe will be a fast growing market."

In the year just ended breweries made £8.98m (£8.27m) profit, Swallow Hotels

companies £655,000 comment (£287,000), and investment in-come £423,000 (£658,000).

Earnings came to \$1.6p (28.3p) and the final dividend is 8.32p for a net total of 12.5p, compared with 11.061p. There was an extraordinary debit of f6688,000 being the provision for closura of Lorimars and Darleys Brewerles £897,000, less tax £209,000.

The directors expected to epend around £25m on capital account next year. Some £15m would go on Swallow, covering the balk of the additional expenditura on the two new botels due to open in 1988, and developments to existing botels, including three further leisure centres.

Expenditure on public houses would absorb £6m and much of the balance would go on brewery developments. £7.58m (£8.65m), wines and The group approached 1987 which has reported profits in splitits fim (£753,000), disposal with a confidence reinforced by creases for the last 18 years in of properties and investments a good start to the current a row, are a solid investment realised £733,000 (£441,000), trading year, they said.

"At Vaux," said chairman Paul Nicholson yesterday, "We believe that the soundest way forward is through organic reinforced by frieodly acquisi-tion." Unfortunetely for him not every company shares the

Vaux view on non-aggressive growth and rumours abound that the group is about to be subjected to a hostile takeover bid. These figures gave Vaux strong defensive ammunition.

The earnings per share growth of about 11 per cent was better of about 11 per cent was better than most expected and there are encouraging signs for the current year in all three divisions. Analysts ere expect-ing about £19.5m at the pre-tax level, which on yesterday's close of 477p, down 7p, puts the there on a multiple of about

shares on a multiple of about 13.5. Bid prospects explain virtually all of the premium which Vaux enjoys to the sector average. But shares in the company, which has reported profits in-

Osborne & Little up 26%

DESPITE CHARGING £165,000 The sbares are quoted on the exceptional expenses for the USM. Osborne and Little lifted its room opened in June and by pretax profit by 25 per cent the end of September egents in the six months ended had been appointed in 12 prin-cipal cities of the US. In the September 30 1986. From turnover up 44 per cent to £3.81m, this producer of wallpapers and furnishing fabrics made e profit of £508,000 (£404,000). Earnings per 5p share worked through et 6.62p (3.31p) and the interim dvidend is raised to 1.3p net revenue in future because of the healthy gross margin that could be obtained there. dividend is raised to 1.3p net (1p).

six months to Septer tion area. Mr Farrer reported that for-1986.

Turnover fell marginally from £30.04 to £29.24m and the directors said that was because of the effect of the lower fuel prices on the group's liquid fuel distribution division. However, volume sales for that division increased considerably which should stand it in good stead when fuel prices increase.

Farming interests bave now been disposed of, and the sale of the farms, together with the release of the working capital involved, produced about 13m. Looking ahead, the chairman, Mr Ronald Alexander said: "The withdrawal from farming marks a significant stage in the rationalisation of the group and there are opportunities for expansion by acquisition currently under examination. "As far as the current year

is concerned, the outlook is for a further increase in the profits of the group." Stated earnings per share of this unquoted company

this unquoted company improved from 3.9p to 5p.

(19). Sir Peter Osborne, the chair-man, esid in line with the per cent, and the pattern looked ustal trend be expected sales eet to continue throughout the and profits to be bigher in tha second half. For the full year ended March 31 1886 sales new ranges leunched in were £6.3m and profits £1.24m. October had been encouraging. MALFRED PREEDY & Sons (convenience stores, news-agents): Interim dividend 1p (same). Pre-tax losses new ranges leunched in \$38.68m (£55.9m) for six months to September 27 1988.

### **UK COMPANY NEWS**

### Whitecroft up 31%: calls for £15m Compsoft

BY ALICE PAWSTHORN

38

Whitecroft, industrial hold-Whiteeroft, industrial non-ing company, is planning a one-for-three rights issue to raise f15.2m to reduce the borrowings incurred by its recent acquisition and capital expenditure programme. The company also reported a 31 per cent increase in interim pre-tax profits to

£3.6m. In the past 18 months White-croft has spent £5m on acquisi-sitions, the bulk invested in the purchase of two lighting com-panies, MD Lighting and Energy Conservation Systems, and £5m on capital for new husiness ventures within the group. An additional £9m has been invested in the property divi-

invested in the property divi-sion. This has increased group borrowings by £17m in the past 18 months, leaving gearing at 64 per cent. The company will issue 7.5m

new ordinary shares at 210p a interim results as an extra-share. Its share price fell by 13p to 247p on the announce-ment yesterday. The issue is ber 30 group turnover rose to underwritten by the merchant £53.9m (£48.7m). In the textile

ket share.

with Alexanders Laing & Cruickshank and Henry Cooke, Lumsden acting as stockbrokers. After the issue gearing will be reduced to about 16 per cent. The company then intends to emhark upon further acquisi-

tions, principally of privately-owned compacies in its existing fields of specialist textiles, light-ing and huilding supplies. It has retained a 12 per cent stake in Eleco Holdings, the construc-tion, engineering and property company, since its unsuccessful takeover hid in August.

stake in Eleco and would keep an open mind on whether to renew its hid. The cost of the original hid was included in the interim results as an extra-ordinary debit of £765,000. In the six months to Septem-ber 50 group turnover pose to

bank, J. Henry Schroder Wagg division operating profits rose institutional interest aroused with Alexanders Laing & to  $\pm 1.4m$  ( $\pm 1.2m$ ) and in lighting at the time of its overtures to Cruickshank and Henry Cooke, to  $\pm 1.6m$  ( $\pm 974,00$ ). Operating Eleco. Certainly companies in to 21.0m (2574,00). Operating profits in the property division were relatively flat at £327,000 (£311,000) and fell in the build-ing supplies businesses to £582,000 (£801,000) largely because of the disruption to trading caused by the transfer of one compare from one site tend not to flood the market with extra paper. The fall in the share price yesterday was prompted as much by dis-appointed hid expectations as by concern over post-rights dilution. Whitecroft seems to of one company from one site Earnings per share rose to Earnings per share rose to 10.0p (7.1p) and the company proposes to pay an interim dividend of 3.0p (2.5p). Mr Weatherby described the pattern of trading in the open-ing months of the second half have succeeded in resolving last year's problems in its lighting division, and building supplies should return to pro-fits growth in the second half.

### comment Ever since the failure of its bid for Eleco, Whitecroft has been bandled about as a take-

fits growth in the second half-Textiles is faring well and the benefits of the £5.5m invest-ment at Edward Hall will filter through from next summer onwards. The City expects pro-fits of about £9m for the full year leaving the sbares on a prospective p/e of 10.5. White-croft is rather too colourless a conglomerate to have ever emerged as a City favourite. as ancouraging and expressed his confidence about the pros-pects for the full financial year.

over target. The company explains the recent rise in its share price as the product of

proposing a one-for-three scrip

deeper into red at £145,000 imminent danger of takeover

> By janice Warma Compost Holdings, the com Composit Holdings, the com-puter software group which ran up a £50,000 loss in the 1985/86 financial year, has plunged further into the red in the six months to end-September with a loss of £145,000 on largely

> a loss of £145,000 on largely static turnover. By September last year, higher operating expenses and the cost of setting up the group's five subsidiaries in Europe had cut first-half pre-tax profits to a virtual break-even figure of just £2,000. Distribution and administra-tion costs plus slower prowth

tion costs, plus slower growth in the micro-computer market

in the micro-computer market accounted for its £50,000 year-and loss to April this year. Mr Nick Horgan, chairman, said the culprit this time was largely higher marketing costs to promote its products in Europe, now that all five sub-sidiaries were fully operational. But he said the victure since But he said the picture since September had improved. "Sales in Europe are climbing. For the last two months, expenditure and income have been about even. As we get our new products into the market, we would expect to move into profit."

The UK showed a £29,000 loss on paper as against £77,000 last time Turnover has remained fiat at £1.1m, while operating costs rose to £1.1m from £972,000.

Western Europe made a loss of £138,000 against £32,000 profit, and other countries showed a £22,000 profit against £47,000. The total loss per share was 2.1p against nil.

### **Exchanges hit Tace** but order books rise

ALTHOUGH PRODUCTS of the Tace group continued to sell well internationally during the

weil internationally unring are 1985-86 year adverse foreign exchange fuctuations left profits at the pre-tax level just £386,000 higher at £3.5m. Second half profits were static at £179,000.

The directors said yesterday that but for the exchange rate movements full year profits would have been more than fim higher. Some 40 per cent of group sales were denomi-nated in US dollars, compared with 31 per cent in 1921.95 with 31 per cent in 1981-85.

For the 12 months to Septem-ber 30, 1986 turnover rose from 520.14m to 522.05m and gross profits from £7.35m to £8.77m— the group manufacturers elec-tronic, electrical and mechanical control equipment.

Distribution and administration costs rose to f1.98m (f1.74m) and f2.94m (f2.23m) respectively and interest charges took f135,000 more at £347,000.

Tax, however, was reduced to £819,000 (£1.12m) and left net profits at £2.68m compared with a previous £2m. Minorities accounted for £574,000 (£625,000.)

Earnings improved from 21.41p to 30.07p and a final dividend of 5.68p raises the net total by 1.87p to 8.52p.

There were extraordinary debits of £496,000 (credits £1.85m), being start-up costs, reorganisation and product rationalisation costs and deficits on disposal of interests in and Goring Kerr's at 270p up 25p trading assets of subsidiaries. and on a multiple of 10. Any The 1985-86 results included dollar rebound could give those

into Anderson Instruments of the US (two months in 1985) and the disposal of the Dutch and Belgian businesses. the red

The directors said that the group's financial strength had enabled it to expand its product range during the year and provide a foundation for future growth. They added that the balance sheet continued to show a strong financial position.

the real stormgard, the investment bolding company, reported a loss before tax of £198,000 in the six months to September 30 1986 compared with a profit of £371,000 in the nine months to September 30 1985. The loss reflected difficult trading conditions experienced by the fashion sector of the group and the directors said that performance during the second half was not expected to improve significantly. Only in 1987-SS were the benefits of the group's reorganisation expected to come through. They said that the group's borrowings had been halved. Stocks were heing reduced as planned and they expected horrowings the second half. Modernisation of production facilities had lowered costs and then enhanced design capahility of the group had enabled a number of new ranges to be introduced. As the group pension arrangements were in substan-tial surplus, contributions by Increased order hooks were seen during the early months of the current year. The group continues to seek further complementary acquisitions to augment growth of its existing activities.

comment

In the last few years, Tace has depended heavily on its majority (now 52.5 per cant) stake in Goring Kerr for growth and the Andersen acquisition was designed to diversify the group. However, both Goring Kerr and Andersen are dollar-orientated and the decline in the US nuit

wiped film off pre-tax profits. This year, orders are picking up for Goring Kerr's new detector products and that company could hit £2.5m pre-tax. For the Tace group as a whole, 54m looks probable with a small increase in demand for Ander-sen's pollution control systems. The latter's tax control should also hoost Tace's earnings per share and prohably indicate that Tace's shares, up 20p to 360p and on a prospective p/e of 11 are more attractive than

a full year's contribution from ratings a boost.

### **EEC Commission to seek** tighter fishing limits

BY TIM DICKSON IN BRUSSELS

42

-----

BY TIM DICKSON IN BRUSSELSTHE EUROPEAN Commission<br/>was set last night to agreed<br/>significantly tighter limits on<br/>EEC fishing in 1987.<br/>In a move almed at conserv-<br/>ing the Community's threatened<br/>etocks the Commissioners are<br/>proposing sharp cuts in the total<br/>allowable catches (TACs) for<br/>certain species. In tha case of<br/>cod, for example, the reduction<br/>im North Sea and Norwegian<br/>Sea zones the decrease will be<br/>even higger.to observing closely the advice<br/>of scientific experts.<br/>The Commissioners are<br/>ation of the Sea (Ices) and the<br/>Scientific and Technical Com-<br/>time when there<br/>is widespread concern about the<br/>excess capacity in Community<br/>fres Commissioo's plans must<br/>first be approved at a meeting<br/>in Brussels next Wednesday<br/>and Thursday of the EEC's<br/>week EEC Fisheries Ministersto observing closely the advice<br/>of scientific experts.<br/>The Commission's plans must<br/>first be approved at a meeting<br/>in Brussels next Wednesdayto observing closely the advice<br/>of scientific experts.<br/>The Commission's plans must<br/>first be approved at a meeting<br/>in Brussels next Wednesdayto observing closely the advice<br/>of scientific experts.<br/>The Commission's plans must<br/>first be approved at a meeting<br/>in Brussels next Wednesdayto observing closely the advice<br/>of scientific and Technical Com-<br/>the community ore all though<br/>alarming evidence of overfishing<br/>in Brussels next Wednesday<br/>and Thursday of the EEC's<br/>week EEC Fisheries Ministersflow from that would represent<br/>a second important achievement<br/>for the Explore<br/>to block in the source<br/>and there intervieweek teck fish or the "damarsal"<br/>(deep water) species; catches of<br/>pelagic" species such as<br/>mackercl and herring will not<br/>the so radically altered.

LONDON **Brussels** MARKETS MARKETS SUGAR WAS the biggest mover among London's soft commodity futures markets yesterday. While coeffee and cocoa edged lower nearby sugar values fell heavily in lata trading, reflecting the touc in the New York Market. Dealers said New York's weakness was triggered by the bearish re-port from the Economist Intelligence Unit which put the 1986-37 world crop at 100.6m tennes, up from 97.7m tonnes for 1985-86. On the London Metal Exchange meanwhile talk of an imminent settlement of the month-old strike at Noranda's accepts **US** maize

### imports

By Tim Dickson

THE EUROPEAN Commission yesterday sppeared to have made a significant conciliatory gesture to the US by accepting import tenders for more than 328,000 tonnes of "third country" maize. The bulk of this is thought to be US grain. The move comes ahead of Friday'a key talks in Brussels hetween senior members of the Reagan Administration and the Europaan Commission. There were suggestions late in Brussels last night of a

**US MARKETS** MOUNTING EXPECTATIONS that the International Coffee Organisation will not inter-vene supportively, along with singgish demand, kept the coffee market on its downward course despite technical sup-port on the contract lows, reports Teineld. Prices in active March lost ground in a text-book erample of a bear-ish trading channel from 141c down to the close at 138c. Locals were steady sellers, hitting commission house sell stops between \$123.80 and \$137.50 in March. The trade remains a slight scale-down buyer but not a large enough participant to hold the market up at current levels. Platinum, gold and silver closed lower. A lack of interest in both gold and silver rather than the influence of a stronger US dollar against foreign currencies was weighing on prices.
